

Romania-Serbia IPA CBC Programme 2014 - 2020

- Final DRAFT -

September 2014

Table of Contents

1.	SECTION 1 - Strategy for the cooperation programme’s contribution to the selected thematic priorities and the relevant Partnership Agreement and Country Strategic Paper(s)	7
1.1.	Strategy for the cooperation programme’s contribution to the selected thematic priorities and the relevant Partnership Agreement and Country Strategic Paper(s)	7
1.1.1.	Description of the cooperation programme’s strategy for contributing to the selected thematic priorities and the relevant Partnership Agreement and Country Strategic Paper(s)	7
1.1.2.	Justification for the selection of thematic priorities	32
1.2.	Justification for the financial allocation	37
2.	SECTION 2 - PRIORITY AXES	41
Section 2.1. Description of the priority axes (other than technical assistance)		41
2.1.	Priority Axis 1	41
2.1.1.	Title and funding source	41
2.1.2.	Fund, calculation basis for Union support and justification of the calculation basis choice	41
2.1.3.	The specific objectives of the thematic priority and expected results	42
2.1.4.	Elements of other thematic priorities added to the priority axis	44
2.1.5.	Actions to be supported under the thematic priority (by thematic priority)	44
2.1.6.	Common and programme specific indicators	49
2.1.7.	Categories of intervention	52
2.1.8.	A summary of the planned use of technical assistance including, where necessary, actions to reinforce the administrative capacity of authorities involved in the management and control of the programmes and beneficiaries and, where necessary, actions for to enhance the administrative capacity of relevant partners to participate in the implementation of programmes (where appropriate)	55
2.2.	Priority Axis 2	56
2.2.1.	Title and funding source	56
2.2.2.	Fund, calculation basis for Union support and justification of the calculation basis choice	56

2.2.3.	The specific objectives of the thematic priority and expected results	57
2.2.4.	Elements of other thematic priorities added to the priority axis	58
2.2.5.	Actions to be supported under the thematic priority (by thematic priority)	58
2.2.6.	Common and programme specific indicators	63
2.2.7.	Categories of intervention	67
2.2.8.	A summary of the planned use of technical assistance including, where necessary, actions to reinforce the administrative capacity of authorities involved in the management and control of the programmes and beneficiaries and, where necessary, actions for to enhance the administrative capacity of relevant partners to participate in the implementation of programmes (where appropriate)	70
2.3.	Priority Axis 3	72
2.3.1.	Title and funding source	72
2.3.2.	Fund, calculation basis for Union support and justification of the calculation basis choice	72
2.3.3.	The specific objectives of the thematic priority and expected results	73
2.3.4.	Elements of other thematic priorities added to the priority axis	74
2.3.5.	Actions to be supported under the thematic priority (by thematic priority)	74
2.3.6.	Common and programme specific indicators	79
2.3.7.	Categories of intervention	82
2.3.8.	A summary of the planned use of technical assistance including, where necessary, actions to reinforce the administrative capacity of authorities involved in the management and control of the programmes and beneficiaries and, where necessary, actions for to enhance the administrative capacity of relevant partners to participate in the implementation of programmes (where appropriate)	84
2.4.	Priority axis 4	86
2.4.1.	Title and funding source	86
2.4.2.	Fund, calculation basis for Union support and justification of the calculation basis choice	86
2.4.3.	The specific objectives of the thematic priority and expected results	87
2.4.4.	Elements of other thematic priorities added to the priority axis	88
2.4.5.	Actions to be supported under the thematic priority (by thematic priority)	88
2.4.6.	Common and programme specific indicators	92

2.4.7.	Categories of intervention	95
2.4.8.	A summary of the planned use of technical assistance including, where necessary, actions to reinforce the administrative capacity of authorities involved in the management and control of the programmes and beneficiaries and, where necessary, actions for to enhance the administrative capacity of relevant partners to participate in the implementation of programmes (where appropriate).....	98
	Section 2.2 Description of the priority axis for technical assistance.....	99
2.5.	Priority axis Technical Assistance	99
2.5.1.	Title	99
2.5.2.	Fund and calculation basis for Union support	99
2.5.3.	The specific objectives of the priority axis and the expected results.....	99
2.5.4.	Actions to be supported and their expected contribution to the programme implementation.....	100
2.5.5.	Programme specific indicators	101
2.5.6.	Categories of intervention	103
2.6.	Section 2.6 Overview table of indicators per priority axis and thematic priority	104
3.	SECTION 3 FINANCING PLAN.....	111
3.1.	Financial appropriation from the IPA (in EUR)	111
3.1.1.	Total financial appropriation from the IPA per year	111
3.1.2.	Total financial appropriation from the IPA and national co-financing (in EUR)	111
3.1.3.	Breakdown by priority axis and thematic priority	114
4.	SECTION 4 - INTEGRATED APPROACH TO TERRITORIAL DEVELOPEMENT...	115
4.1.	Community-led local development (where appropriate)	115
4.2.	Integrated Territorial Investment (ITI) (where appropriate).....	115
4.3.	Contribution of planned interventions towards macro-regional and sea basin strategies, subject to the needs of the programme area as identified by the relevant partner States and taking into account, where applicable, strategically important projects identified in those strategies (where appropriate).....	116
5.	Section 5 - IMPLEMENTING PROVISIONS FOR THE COOPERATION PROGRAMME	119
5.1.	Relevant authorities and bodies.....	119

5.2.	Joint Monitoring Committee	120
5.3.	Procedure for setting up the joint secretariat	121
	Procedure for setting up the joint secretariat	121
5.4.	Summary description of the management and control arrangements	122
5.5.	Apportionment of liabilities among partner States in case of financial corrections imposed by the managing authority or the Commission.....	128
5.6.	Use of the Euro (where applicable).....	129
5.7.	Involvement of partners	130
6.	SECTION 6 - HORIZONTAL PRINCIPLES	133
6.1.	Sustainable development.....	133
6.2.	Equal opportunities and non-discrimination.....	134
6.3.	Equality between men and women	136

Programme draft

CCI	
Title	Romania-Serbia IPA CBC Programme 2014-2020
Version	1
First year	2014
Last year	2023
Eligible from	01.01.2014
Eligible until	31.12.2022
EC decision number	
EC decision date	
MS amending decision number	
MS amending decision date	
MS amending decision entry into force date	
NUTS level III regions (or equivalent regions in the non-MS) covered by the cross-border cooperation programme	Romania: Timiș, Caraș-Severin, Mehedinți Serbia: Severnbanatski, Srednjebanatski, Južnbanatski, Braničevski, Borski, Podunavski

1. **SECTION 1 - STRATEGY FOR THE COOPERATION PROGRAMME'S CONTRIBUTION TO THE SELECTED THEMATIC PRIORITIES AND THE RELEVANT PARTNERSHIP AGREEMENT AND COUNTRY STRATEGIC PAPER(S)**
- 1.1. Strategy for the cooperation programme's contribution to the selected thematic priorities and the relevant Partnership Agreement and Country Strategic Paper(s)
- 1.1.1. Description of the cooperation programme's strategy for contributing to the selected thematic priorities and the relevant Partnership Agreement and Country Strategic Paper(s)

Strategic Policy context

The Romania-Serbia IPA CBC Programme (hereinafter referred to as the "Programme") is designed in the framework of the European strategy for a smart inclusive and sustainable growth. Below are summarized the main policy frameworks at European, national and regional level.

The Europe 2020 strategy

Europe 2020 strategy puts forward three mutually reinforcing priorities:

- Smart growth: developing an economy based on knowledge and innovation.
- Sustainable growth: promoting a more resource efficient, greener and more competitive economy and
- Inclusive growth: fostering a high-employment economy delivering social and territorial cohesion.

It also sets focus on five overarching headline targets that have to be reached by 2020.

These targets require a mixture of national and EU actions, utilising the full range of policies and instruments available. The same principle applies for the seven underpinning flagship initiatives.

In the context of the Programme synergies with the aforementioned national and EU actions are to be sought. Two European Commission (EC) communications were released in 2010 and 2011 on smart and sustainable growth respectively, outlining the relevance of CBC programmes.

The European Territorial Agenda 2020 is paramount in defining the importance of CBC claiming that “territorial integration...is a key factor in global competition facilitating better utilisation of development potentials and the protection of natural environment” aiming at integrating the territorial dimension within different policies at all levels of governance.

Additionally the European Territorial Agenda 2020 identifies some key challenges and potentials for territorial development. These include increased exposure to globalisation, demographic changes, social and economic exclusion, climate change, and loss of biodiversity, all relevant to the Programme area.

Role of the Cross Border Cooperation in the European strategy

The European Territorial Agenda describes the European Territorial Cooperation (ETC) and CBC Programmes, as “... a key factor in global competition... facilitating better utilisation of development potentials and the protection of natural environment”¹.

A typology of results of ETC programmes, which reveals some crucial aspects of the ETC approach, is the following²:

- Integration related results, i.e. the establishment and implementation of joint territorial governance mechanisms for common assets;
- Investment related results, i.e. delivering socio-economic benefits similar to mainstream programmes either by direct investments or by preparing such investments and
- Performance related results, i.e. inducing improvements of organisational and individual performance.

While these three categories provide a starting point, the “*Elements for a Common Strategic Framework 2014 to 2020*” suggests in Annex II a number of other characteristics of cross-border cooperation:

- Support the joint management and promotion of the shared major geographic features;
- Achieving a critical mass for success, especially in the field of innovation and ICT;
- Achieving economies of scale for more efficient investments in services and infrastructure;

¹ While many definitions are attempted to explain European Territorial Cooperation (ETC) and CBC Programmes, most of them end up being very broad or indistinguishable from other forms of ETC like cross-border cooperation (e.g. addressing challenges beyond national borders or actions of common planning and management).

² INTERACT, working documents.

- Providing support for the coherent planning of transport infrastructure (including TEN-T) and the development of environmentally friendly and interoperable transport modes in larger geographical areas.

The present Programme is characterised by some additional features, which can be summarised as:

- Coverage of a large area with a high diversity of regions and often conflicting interests;
- Full Integration into a Macro area framework, the Danube Macro Region, which generates substantial challenges and opportunities of coordination and synergies.

The EU Strategy for Danube Region (EUSDR)

The Programme contributes to and interacts with, the Macro Regional strategy that the EU has devised for the countries and regions that share common needs and objectives in the Danube Region.

The EU Strategy for the Danube Region (EUSDR) provides an overall framework for parts of Central and South East Europe area aiming at fostering integration and integrative development. The Danube Region covers 14 countries (Germany, Austria, the Slovak Republic, the Czech Republic, Hungary, Slovenia, Romania, Bulgaria Croatia, Serbia, Bosnia and Herzegovina, Montenegro, Republic of Moldova and Ukraine. Thus, the Danube Region encompasses the entire Programme area.

The strategy includes four pillars

- (1) Connecting the Danube Region,
- (2) Protecting the environment in the Danube Region,
- (3) Building prosperity in the Danube Region and
- (4) Strengthening the Danube Region.

It is accompanied by a “rolling” Action Plan breaking down eleven Priority Areas into actions and project examples. The proposed list of the strategic actions were taken into account in the Programme strategy.

The Romanian EU Partnership Agreement

The Romanian Partnership Agreement highlights the central role of the CBC programmes in which Romania participates, for the contribution to the EU development strategy.

The Partnership Agreement emphasizes the importance of promoting the EUSDR, as macroeconomic strategies offer a new, more substantial and consistent cooperation platform that can be financed not only from dedicated funds.

The planned EUSDR Romania interventions include five different areas, namely transport (e.g.: development of bridges and port infrastructure), network of settlements (e.g.: connecting Bucharest and the Danube river), environment (e.g.: protection of the Danube Delta), society (e.g.: improvement of social infrastructure) and economy (e.g.: exploiting the agricultural, energy and tourism potential of the Danube area).

According to the Partnership Agreement, CBC programmes should also emphasize the importance of promoting employment, improving tourism and promoting cultural heritage while enhancing the connection between the communities of the border areas. Improvement of the transport and environmental system is also promoted. Romania is committed to remove the existing bottlenecks concerning the cross-border transport flows and to strengthen cooperation especially in the energy sector, in order to raise energy efficiency, decrease pollution and to widen the production, distribution and consumption of renewable energy sources.

The National Programme for the Adoption of the Acquis - NPAA (2014-2018) of the Republic of Serbia

According to the National plan, the Republic of Serbia is highly motivated to develop relations with immediate neighbours and countries in the region of South-East Europe, thus affirming one of the priorities of its foreign policy - improvement of regional cooperation. In the strategy of Serbia, regional cooperation, especially through regional fora and initiatives, although not replacing the process of integration to the EU, represents a central contribution to strengthening of bilateral relations with the neighbours and the states from the South - East Europe region.

Republic of Serbia is actively contributing specially to the Danube Macro Region Strategy, thus assigning a special role to the CBC Programme with Romania, for the contribution to the wider strategy, and the creation of an integrated framework for the achievement of the EUSDR objectives.

Regional Development Strategy Republic of Serbia

The last regional development strategy of Serbia, designed in 2006 for the period 2007-2012, identified some key objectives that are still relevant and coherent to the strategy of the Programme:

- ✓ Sustainable Development
- ✓ Enhancing regional competitiveness
- ✓ Alleviation of regional disparities and poverty
- ✓ Curbing negative population trends
- ✓ Continuing decentralization and approximation of the European NUTS system

The results of the Territorial Analysis prove that several of these objectives are still relevant and applicable in the eligible area, especially: sustainable development, alleviation of regional disparities, curbing negative population trends.

CBC and Interregional Programmes accessible in the programme area

The Programme Area partially overlaps (e.g. CBC HU-RS) or is contained (e.g. South East Europe or the future Danube Programme) to a number of other Territorial Cooperation Programmes. Many of these Programmes follow similar objectives and have relevant thematic orientations. The evaluation of the current programme signalled the need to improve coordination and to exploit synergies. In all cases, they contribute to the development of capacity and know-how among the administration and stakeholders of the region about the *modus operandi* of Territorial Cooperation. The table below gives an overview of the current programmes 2007-2013, the perspective asset for the next 2014-2020 programming period, and the common eligible territories.

Programme Strategic Objectives in the current programme period Budget	Priority Axes ³	Shared Eligible Area in RO-RS	Planned 2014-2020 programme	Relevance and potential interaction with CBC RO - RS Programme
<p>INTERREG- IV</p> <p>Improve, by means of interregional cooperation, the effectiveness of regional development policies in the areas of innovation, the knowledge economy, the environment and risk prevention as well as to contribute to economic modernisation and increased competitiveness of Europe.</p> <p>Budget 420 MEuro</p>	<p>PA1: Innovation and knowledge economy PA2: Environment and risk prevention</p>	<p>Serbia: Non eligible Romania: whole area</p>	<p>Confirmed INTERREG EUROPE</p>	<p>Low</p> <p>Transnational European cooperation, not specifically targeting the regional needs and challenges.</p> <p>Potential synergies from the cooperation between local bodies and European most advanced regions, leading to possible transfer of good practices, innovation in development policies.</p>
<p>SEE</p> <p>Improvement of the territorial, economic and social integration process and contribution to cohesion, stability and competitiveness through the development of transnational</p>	<p>PA1:Facilitation of innovation and entrepreneurship PA2: Environment PA3: Accessibility PA4:Transnational synergies for sustainable growth areas</p>	<p>Whole area</p>	<p>Split in two programmes :Danube (including the whole programme area) and Adriatic</p>	<p>Medium</p> <p>Strong interaction with Danube region programme. Strong need of coordination of investments and actions, to avoid duplications and maximize synergies.</p>

³ Excluding Technical Assistance

partnerships and joint action on matters of strategic importance. Budget 246 Meuro				Lower relevance for the Adriatic Ionian programme.
IPA CBC Hungary Serbia Facilitation of a harmonic and cooperating region with a sustainable and safe environment. Budget 21,7 MEuro	PA1: Infrastructure and Environment PA2: Economy, Education and Culture	Serbia North and Central Banat	Confirmed	Medium to High Strong interaction for the implementation of the Danube strategy, same eligible partners can lead to competition for projects and/ or duplication. Coordination needed. Current experience proves that the strong links with Hungarian communities can attract beneficiaries in this programme, reducing interest for RO-RS Programme.
IPA CBC Bulgaria Serbia Strengthen territorial cohesion of the Bulgarian-Serbian cross-border region, its competitiveness and sustainability of its development through co-operation in the economic, social and environmental area over the administrative borders.	PA1: Development of small-scale infrastructure PA2: Enhancing capacity for joint planning, problem solving and development	Serbia Borski	Confirmed	Medium Strong interaction for the implementation of the Danube strategy, same eligible partners can lead to competition for projects and/ or duplication. Coordination needed. Potential synergies in the

Budget 13,5 Meuro				actions for cross border integration
ERDF CBC Hungary Romania Bring the people, communities and economic actors of the border area closer to each other in order to facilitate the joint development of the co-operation area, building upon the key strengths of the border region. Budget 275 MEuro	PA1: Improvement of the key conditions of joint, sustainable development in the co-operation area PA2: Strengthen social and economic cohesion of the border area	Romania Timiș	Confirmed	Medium to high Strong interaction for the implementation of the Danube strategy, same eligible partners can lead to competition for projects and/ or duplication. Coordination needed. Potential synergies in the actions for cross border integration
ERDF CBC Bulgaria Romania Bring together the people, communities and economies of the Romania-Bulgaria border area to participate in the joint development of a cooperative area, using its human, natural and environmental resources and advantages. Budget 262 Meuro	PA1: Improved mobility information and communication PA2: Sustainable use and protection of natural, risk management PA3: Economic development and social cohesion	Romania Mehedinți	Confirmed	Medium to high Strong interaction for the implementation of the Danube strategy, same eligible partners can lead to competition for projects and/ or duplication. Coordination needed. Potential synergies in the actions for cross border integration

Apart from those programmes, various international, bilateral and European programmes have supported interventions for a various number of topics, ranging from environmental infrastructure and urban rehabilitation up to economic development and civil society environment. Romania after accession to the EU in 2007 has been able to use Structural Funds to its avail, building on the rich experience accumulated through PHARE. In Serbia CARDS and IPA efforts have been accompanied by numerous projects e.g. through GTZ, World Bank and other donors. The 2014-2020 Programme should build on past experiences and projects from different frameworks.

Last but not least, a number of euro regions are active in the area, the most important being the “Danube-Kris-Mureş-Tisa Regional Cooperation” (DKMT) established in 1997 with the aim to develop and broaden relationships among local communities and local governments in the field of economy, education, culture, science and sports - and help the region to maintain the process of the European integration.

The Euroregion maintains a number of workgroups in the domains:

- Economy, infrastructure and tourism workgroup
- Urbanism, nature and environmental protection workgroup
- Culture, sports, non-governmental organisations and social issues workgroup
- International relations, information and mass communication workgroup
- Catastrophe prevention workgroup
- National health workgroup
- Healthcare workgroup
- Industrial park workgroup
- Tourism workgroup
- Agricultural workgroup

The DKMT demonstrates an example of bottom up engagement and also a platform for sustainable project results, acting as a show case of cross border governance and integration and as a framework to refer to.

The Romania-Serbia Cross Border Cooperation area

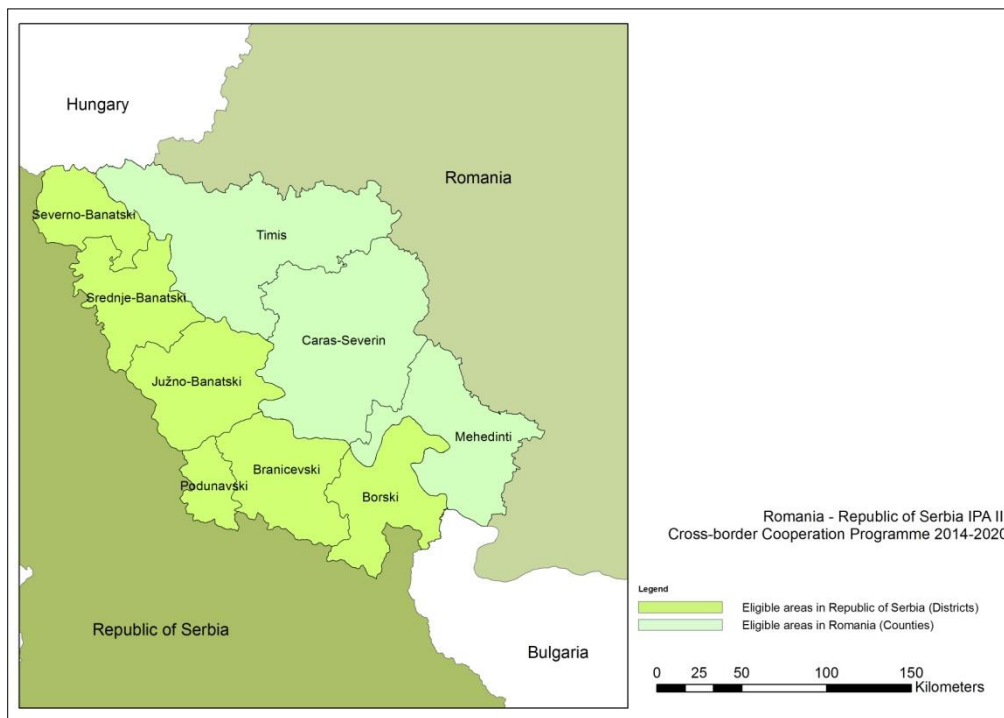

The eligible area for the programming period 2014-2020 under the Programme will include three counties of Romania, and the six districts of the Republic of Serbia⁴.

The programme area is at the centre of the European Danube Macro Region. The two partner countries include a large share of the river basin, their total surface representing 10% of the basin in Serbia and 29% in Romania⁵.

⁴ DG Regio: draft implementing acts. list of ETC programmes: http://ec.europa.eu/regional_policy/what/future/experts_documents_en.cfm#2

⁵ <http://www.icpdr.org/main/danube-basin/countries-danube-river-basin>

The total area is 40.596 sqkm (53,1 % in Romania/ 46,9% in Serbia), including the Romanian counties Timiș, Caraș-Severin and Mehedinți, and the Serbian districts (Severnobanatski, Srednjebanatski, Južnobanatski, Braničevski, Borski, Podunavski).

Map 1 The eligible area of the Romania Serbia IPA CBC Programme

The eligible area is split in two NUTS2 regions in Romania, and two NUTS2 regions in Serbia.

In Serbia, the three Banat districts belong to the Autonomous Province of Vojvodina, an administrative entity classified as NUTS2 statistical region according to the law 46/2010, which has revised the territorial statistical units in Serbia according to the EU criteria. The Braničevski, Borski and Podunavski districts belong to the NUTS2 statistical region of Southern and Eastern Serbia.

In Romania, Mehedinți County belongs to the Development Region South West. The two counties of Caraș-Severin and Timiș belong to the development Region West.

Country	NUTS 3 units or equivalent:	Administrative status	Capital city / Seats of districts
România	Timiș	County	Timișoara
	Caraș-Severin	County	Reșița
	Mehedinți	County	Drobeta Turnu-Severin
Republic of Serbia	Severnobanatski	District	Kikinda
	Srednjobanatski	District	Zrenjanin
	Južnobanatski	District	Pančevo
	Braničevski	District	Požarevac
	Borski	District	Bor
	Podunavski	District	Smederevo

Eligible areas

The eligible territory in Republic of Serbia represents 20.8% of the total, a larger share than in Romania, where the three eligible counties represent just 9% of the national territory.

The length of the border in the eligible territories between Romania and Republic of Serbia is 546 km, out of which 290 km (53.1%) on the Danube River. The length of the border in the programme area represents 26% of the external borders of Republic of Serbia, and 17% of the external borders of Romania.

Along this common border there are 5 constantly operating road border crossings and 2 constantly operating railroad crossings. Also, there are 6 fluvial ports in Serbia, and 3 on the Romanian shore.

According to the 2011 census⁶, a population of roughly 2.4 million lives in the eligible area, that represents roughly 9% of the total combined national populations of Romania and Republic of Serbia. Based on the most recent estimations, in the eligible area roughly 7% of the GDP of the combined national GDP of the two countries is produced.

The geography of the region is complex and heterogeneous.

⁶ NIS Serbian Census 2011.

The Banat Plains extend in the North in the Serbian Districts and Timiș County. Moving to South East, transition hills between the plains and mountains lead to the centre occupied by the Southern Carpathians range, with Banat Mountains, Țarcu-Godeanu Mountains and Cernei Mountains and elevations between 600 and 2100 meters in Caraș Severin district. The Danube flows in the South Banat plains, at the border with the Braničevski district, and it reaches the border between Romania and Serbia in the vicinity of Baziaș in Romania. In Romania, Timiș, Cerna, Caraș and Nera rivers cross the counties, some of them through spectacular valleys and gorges. Also is worth to mention the Bega channel, connected to the Rhine - Danube network.

Between the southern Carpathian Mountains and the north-western foothills of the Balkan Mountains, the Danube flows through the Iron Gates gorges (Iron Gates is another name of Đerdapska klisura and it is stretching from Golubac to Simska klisura, 98 km. The Đerdap / Portile de Fier water gate is half on Romanian and half on Serbian side). The Romanian side of the gorge constitutes the Portile de Fier natural park, whereas the Serbian part constitutes the Đerdap national park. In the South East is the Western end of the Southern Carpathians. In the Borski district there are Veliki Krš, Mali Krš and Stol mountains, dominated by karst formations, and are collectively known as "Gornjanski kras". In Romania there are the Mehedinți Mountains with heights of up to 1500 m. The heights decrease towards the South East, passing through the hills to a high plain to the Western end of the Romanian Plain.

The relations between the eligible area and the Danube Region can be analysed in the following main fields: socio-economic development, mobility, energy, natural and cultural resources, risks of environmental catastrophes.

In all these fields of interaction challenges and opportunities can be identified, according to the scale of the phenomena, local, regional or international, and according to the main driving factors, like the global environmental changes or the international tourism markets.

In some areas a strong interdependency between the eligible area and the larger Danube region can be identified. These areas are dominated by international and interregional factors, with impact that largely overcome the regional dimension. Some examples: reduction and prevention of pollution of land, water and air by industrial and urban sources, control and mitigation of environmental risks, development of the integration of the European Transport Networks. In these areas the action of the Programme partners should be focused on the integration of the local with the global strategies at the level of Danube region.

In other areas there is always strong interaction, but the main driving factors depend at list in part on local factors, therefore the local stakeholders can benefit of some autonomy, planning interventions that do not entirely depend, but can benefit, from cooperation at the larger Danube regional level.

Among these areas can be mentioned the preservation of environmental resources, biodiversity, landscape; development of renewable energy sources, increase of accessibility and connectivity, reduction of localized pollution sources, promotion of smart innovation initiatives.

Last, there are areas of competitive interaction, where the single territories in the Danube regions are at least in part “in competition” among them, because the local actors aim to the same markets niches or to the same global partners.

Two examples of this type of interaction can be those of: the attraction of thematic tourism (cultural tourism, natural tourism), the attraction of foreign direct investments.

In the eligible area the main potentials of action can be identified in the fields of environment protection, SMART innovation, accessibility, renewable energy. Most of these areas can aim to a synergic interaction within the Danube Region.

In some other areas, especially the promotion of tourism along the Danube River, the development of transport services, multimodal hubs the promotion of innovation and research clusters, a cooperative action should be established, in order to maximize synergy and avoid negative impact of competition.

The main results of the territorial analysis are summarized below:

Social and demographic structure and dynamics

- Similar number of inhabitants on the two sides of the border;
- Population unequally distributed, with low density in rural areas and in the mountains, higher density in plains in the North and West Banat Plains;
- Decline of population main structural process in the whole eligible area, all Serbian territories and most of Romanian losing population, often more than 10% in a decade;
- Serious aging of the population as a consequence of emigration and natural decline, especially in the rural areas, and in the South East;
- Just one large urban pole, Timișoara, inside the area. Two urban poles in Serbia very close to the edge of the eligible area (Novi Sad and Belgrade);
- Most of the regions predominantly rural, in the South East remote rural, especially considering the limited access to large urban poles;
- Numerous ethnic minorities in the area, large communities of Hungarians in the North, Roma communities present in all areas. Romanian, communities especially in the Centre and South of eligible area in Serbia, and Serbian communities in Timiș and Caraș Severin counties;
- Natural demographic trend is negative in most areas, with limited positive trends in Timiș county;

- Most of the migration flows are directed outside of the eligible area, limited share of migration is directed to metropolitan areas in the eligible area in Romania.

Economic structure and dynamic

- The economic development of the whole area, measured with the GDP per capita, is close to the national levels, but the average is the result of strong dualism, especially between North and South East, on both sides of the border;
- In Romania, in Timiș the GDP/pc is almost double than the national average, in Caraș Severin and Mehedinți GDP /pc is 30% lower;
- In Serbia, in the Vojvodina autonomous province the level of GDP is almost at the level of Serbia average, while in Braničevski and Borski 40% lower. Among the Banat districts in Voivodina, the North lags behind the others in terms of GDP per capita;
- In the North, the growth pole of Timiș county generates an impact that extends beyond the borders, producing a potential for cross border interactions;
- In the centre, and south east, the comparable level of GDP and the similar structure more bilateral partnership than unilateral flows.

Regarding the economic sectors:

- Agriculture presents a very dualistic quality and quantity distribution of resources, and levels of productivity, between the plains of Banat and Timiș and Carpathian Mountains area;
- Mining: in metals, oil represents a historical specialization in the area, it experienced a sharp decline in the last decades because of structural factors, quality and quantity of reserves, and international competition of new producers;
- Energy: very large hydro electrical power capacity on the Danube centrals, and some small plants in the other rivers, some potential of development in renewable resources, in particular biomass in the central and south eastern areas.
- Manufacture: traditional productions in large part of the eligible area; Strong growth of innovative sectors in recent years, due also to strong FDI flows both in Serbian and Romanian regions.
- Services: Basic services in health, education, utilities commerce, transport, present in the area. Advanced services strongly concentrated in the urban poles in Timiș County in Romania, smaller centres, often connected to the leading institutions in Serbia

The labour market

- Activity rate per sector: Strong dualism between North eligible area (labour concentrated in manufacturing, lower agricultural activity) and the Centre East (labour concentrated in agriculture);
- In the eligible area lower employment rate than in the national average; lower rate of activity;
- Strong disparities inside the eligible area, between Timiș County, with very low unemployment and high activity rates, and other counties and districts, with higher unemployment in the South-East;
- Strong dualism across the border in the north, with full employment in Romania, and high unemployment in the neighbour district;
- In the labour market limited differences among women and men unemployment rate.

Social inclusion and poverty:

- The area is affected by poverty and social exclusion of large shares of the population, concentrated in the rural areas, and in the mountainous areas.
- Main factors of social exclusion and poverty risk seem unemployment, and capacity to access basic services due to remoteness.
- Significant higher unemployment rates among young active population in the rural areas, and among Roma minorities.

Health care services

- In the eligible area the availability of health care services is relatively homogenous, with one exception that is that of Timisoara, where the concentration of health care service centres is close to the double than in the rest of the eligible area.
- University centres of Medicine are located In Timisoara, inside the eligible area, and in Novi Sad, Belgrade, Niš at the edge of the eligible area in Serbia.
- In recent years an intensive growth of private centres for health care services, including private hospitals, have been developing all over the eligible area, in particular in the main urban centres.
- This process could lead to a larger disparity in the accessibility of health care services among urban and rural population, and active and non-active groups (elders, disadvantaged groups).

Public Transport and ICT infrastructures

- Eligible area well connected to main European Networks, central position in the Rhine-Danube European core network;
- Disparities in the accessibility of international network among the eligible area;
- Areas close to Belgrade and to Timiș much better accessible from international networks than the others;
- Areas in the plains are better connected than those peripheral and in the mountain area; density and quality of the local transport network lower than the national average;
- Low speed of public transport services reduces accessibility of rural and remote areas;
- Accessibility of border crossings sufficient, but poor quality of infrastructure;
- Interconnection of eligible area is limited by infrastructure quality and distances;

Environmental resources and infrastructure

- Divide of land use and land cover with agriculture dominating in the North-West and mountain and forested areas dominating in the South-East, with punctual foci of human activity (e.g. mines);
- Rich natural environment and cultural heritage with many small and dispersed attractions which is at pressure either by abandonment in peripheral areas or by overexploitation in the plains;
- Large number of NATURA 2000 and Natural Protected Areas covering a large part of the programme area;
- Rivers and water bodies mostly heavily modified and with weak ecological potential burdened by agricultural, industrial and municipal discharges;
- Relative low level of service of water supply and sewage treatment especially in the rural areas and difficulties to overcome this by conventional approaches;
- Environmental Infrastructure, is often obsolete, underperforming and with limited perspective for financing beyond rudimentary operation and maintenance;
- Municipal waste treatment is nascent and is relying in simple landfills or uncontrolled dumps;
- Air pollution in the urban centres as a consequence of traffic and poor industrial emissions standards;
- Environmental hotspots and risks, especially due to past and present mining and industrial activity, in many cases in remote areas with poor civil protection mechanisms;
- Flood risks (fluvial and flash floods) in different parts of the Programme area;
- Flood awareness systems and disaster protection improving and connecting to European networks but still poor at the local level.

Tourism

- Relevant potential for various types of tourism on both sides of the border, based on natural and historical resources, and on business and cultural activities that attract tourism demand;
- Ecotourism in the protected areas, cultural tourism attracted by historical heritage, business tourism generated by growing international integration of industrial clusters and business poles, present the highest potential;
- Resources are sparse on the territory, producing a potential for integrated tourism networks, more than for spot tourism attractions. All tourism attractors present a potential for integration in cross border networks;
- Accommodation infrastructure is underexploited, signalling the need for soft investments in coordinated actions for increasing attractiveness and national and international demand;
- International connections are adequate for tourism travels to the area, but the quality of local transport infrastructure and services is poor, constraining the development of coordinated offers and cross border initiatives;

Education, research and innovation

- The educational system is experiencing intensive structural changes in both countries;
- Basic primary and secondary education quantitatively adequate in the eligible area, limited differences in pre-primary education, more developed in Romania;
- The eligible area presents an unequal distribution of higher education and research poles;
- Private schools are growing in both countries;
- In the North of the eligible area, in Romania counties, are located many university poles, with a national and international potential;
- In Serbia there are no large university poles in the eligible area, but many are located close to the edge in the main urban poles, accessible to the local population;
- Many research centres in the Romanian area, fewer on the Serbian side.
- Common needs of improvement of the effectiveness and quality results of education;
- Common needs of improvement of the access to education for disadvantaged groups;

Lessons learned in the current programme period

The specific objectives of the current programme are addressed through 3 thematic Priority Axes:

- PA 1 “Economic and Social Development” is directly linked to Specific Objective 1;
- PA 2 “Environment and Emergency Preparedness” is directly linked to Specific Objective 2;
- PA 3 “Promoting People to People Exchanges”

According to the feedback from the stakeholders, the Programme’s Strategy is still consistent with the socio-economic environment of the cross-border area and both the logic of intervention and needs remain valid. After the assessment considering the structural and economic changes happened in the programme implementation period, the assumptions of the SWOT analysis have largely remained the same, marked by the economic downturn.

However, according to the survey carried out during the Programme evaluation exercise, the programme stakeholders consider the strategy too broadly defined, lacking of focus on specific development priorities for the area.

Programme Stakeholders also pointed out the need of stronger coordination with the central administrative level in each country and with the MAs of other IPA Programmes covering overlapping eligible regions (Romania - Serbia, Hungary - Serbia and Bulgaria - Serbia) and with the European macro-regional strategies relevant to the cross-border area⁷.

The territorial distribution of projects shows that all counties and districts have been involved, in both countries at least one application was submitted from most of the municipalities.

A concentration of project applications in Timiș County and in Centre and South Banat, can be observed, both in terms of number of applications and in terms of total cost of projects. However, the relative distribution of project applications, compared to the population, proves that the Caraș Severin and Mehedinți counties have been even more active than the Timiș County, and the Borski district, has been more active than the two Banat districts.

The results of the two calls for projects carried out during the 2007-2013 programme implementation proved that the target groups generated a large number of projects addressing all priorities.

A slightly lower performance has been observed for the priority 2, for Environment and Emergency Preparedness. According to the stakeholders, the main reason is due to the difficulty of NGOs to access this priority.

⁷ Evaluation Report Romania-Republic of Serbia Programme 2012

The second call, dedicated to the priority 2 dedicated to EUSDR, led to the approval of 6 projects on environmental protection and emergency management. However, the implementation of these projects is experiencing some difficulties, due to the administrative complexity associated to the large budget and the technical content.

On the basis of the lessons learned in the current period, the partners expect a confirmation of most of the objectives of the current period and an effective generation of joint projects. Most stakeholders do expect a stronger focus on concrete results, and the identification of actions capable to generate a permanent impact in the eligible area.

The common aim for the simplification of management procedures also emerged, in particular for shortening the time length of the evaluation, selection and contracting procedures.

More detailed notes on the current programming experience are presented below, in the framework of the identification of strategic options.

The SWOT analysis

Based on the Territorial Analysis (TA) and the consultation among potential beneficiaries and stakeholders, a SWOT analysis of the area has been developed. The SWOT focuses on those issues that are relevant for the identification of the development challenges that can be addressed by the CBC programme. It is clustered in 6 main areas in accordance to the Territorial Analysis.

Sector	Strengths	Weaknesses	Opportunities	Threats
Social and demographic structure	<ul style="list-style-type: none"> ➤ Presence of urban poles accessible to a significant part of the population ➤ Equal number of population on the two sides of the border in the eligible area, facilitating balanced partnership ➤ Long history of Romanian-Serbian cooperation ➤ Tradition of respect and coexistence among ethnic groups 	<ul style="list-style-type: none"> ➤ Large part of population living in small settlements scattered in remote rural areas, which not being able to compete with the larger urban poles, lose population ➤ High share of population at risk of poverty 	<ul style="list-style-type: none"> ➤ EU support for social inclusive growth ➤ Growing social and cultural ties between RO and RS ➤ Integration in the macro regional framework of EUSDR. 	<ul style="list-style-type: none"> ➤ Continuing aging of population ➤ Relative attractiveness of metropolitan areas, also due to EU integration, pulling out emigration and accelerating marginalization of rural areas ➤ Declining population, especially of young active people
Economy, SMEs development,	<ul style="list-style-type: none"> ➤ Presence of dynamic economic poles in the area 	<ul style="list-style-type: none"> ➤ Strong dualism in economic development, between more advanced districts (Timiș, Banat) and 	<ul style="list-style-type: none"> ➤ Growth of industrial and business clusters inside the eligible area and at the 	<ul style="list-style-type: none"> ➤ Uncertainties in the global and national economic scenario leading to decline of

Sector	Strengths	Weaknesses	Opportunities	Threats
Labor Market	<ul style="list-style-type: none"> ➤ Traditional industrial presence with local “ecosystems” operating ➤ Attractiveness and capacity for FDIs, continuing after global crisis ➤ Large availability of local resources, in agricultural land, mineral reserves, renewable energy resources 	<p>others, in industrial sectors, SMEs development, services,</p> <ul style="list-style-type: none"> ➤ Low access to basic services in rural and remote areas ➤ High level of unemployment in lagging behind districts and counties 	<p>edge, promoting business and facilitating access to services and jobs of resident population.</p> <ul style="list-style-type: none"> ➤ Investments supported by IPA II strategy in Serbia and Cohesion Policy in Romania offering potential synergies with cross border initiatives 	<p>investments (national and FDI)</p> <ul style="list-style-type: none"> ➤ Persistence of high unemployment rates, due to weak economic growth at national level
Transport infrastructure , Accessibility, CBC connection	<ul style="list-style-type: none"> ➤ Strategic location in the European Corridors Network ➤ Good accessibility from larger centers to national and international destinations, due to adjacent national roads, rail and airport connections 	<ul style="list-style-type: none"> ➤ Poor quality of local and intraregional transport infrastructures for moving within the eligible area ➤ Severe limitations to accessibility in rural and mountainous areas ➤ Heterogeneous service level of border crossing points 	<ul style="list-style-type: none"> ➤ New infrastructure and services developed in the EU corridors network ➤ Soft technologies for the development, operating and monitoring of more efficient transport services 	<ul style="list-style-type: none"> ➤ Financial crisis limiting capacity of local administration to maintain local transport infrastructure ➤ Risks for security from increasing illegal traffic flows (illegal migration, smuggling, especially along the fluvial routes)

Sector	Strengths	Weaknesses	Opportunities	Threats
	<ul style="list-style-type: none"> ➤ Good availability of border crossings 	<ul style="list-style-type: none"> ➤ Poor efficiency of local transport services ➤ Poor development of common transport monitoring systems on the Danube 	<ul style="list-style-type: none"> ➤ Advanced transport monitoring infrastructure on the Danube on the Romanian side 	
Environment, Natural and cultural resources, Tourism	<ul style="list-style-type: none"> ➤ Low levels of pollution in peripheral areas of scenic beauty ➤ Major natural resources for tourism development: national and natural parks, thermal springs, forests and areas of outstanding natural beauty ➤ Striking cultural, ethnic and natural diversity, generating attractiveness for business and tourism 	<ul style="list-style-type: none"> ➤ Environmental hotspots and risks, especially due to past and present mining and industrial activity ➤ Obsolete environmental infrastructure ➤ Disaster protection and preparedness systems improving but are still weak especially at the local level. ➤ Flood risks (fluvial and flash floods) in various parts of the eligible area 	<ul style="list-style-type: none"> ➤ European strategies for environmental protection in macro regions, offering additional support to local strategies (Danube region) ➤ International proofed models of voluntary local disaster response and preparedness systems with low overall costs available Europe-wide 	<ul style="list-style-type: none"> ➤ Demographic decline of marginal areas increasing risk of environmental degradation due to abandonment of settlements and industrial areas ➤ Climate change leading to increased extreme events: floods, forest fires, droughts etc ➤ Risks emerging outside of the eligible area, e.g. pollution upstream in Danube, which can have severe impacts in the area

Sector	Strengths	Weaknesses	Opportunities	Threats
	<ul style="list-style-type: none"> ➤ Low population density and low pressure in naturally attractive and remote areas 	<ul style="list-style-type: none"> ➤ Dispersion of tourism attractors in small poles in a large territory, limiting the capacity to attract international demand ➤ Insufficient exploitation of existing tourism infrastructure, leading to low productivity and non-sustainability of private investments 	<ul style="list-style-type: none"> ➤ Growth of new models of tourism attracted by local resources. (Eco tourism, rural tourism, business tourism, etc.). ➤ International networks promoting integrated offers (e.g. Green ways along Danube) 	<ul style="list-style-type: none"> ➤ Shrinkage of public budgets and lack of funds for environmental infrastructure renewal and reclamation of brown-fields ➤ Increasing competition by National and European touristic destinations
Education, R&D, Innovation	<ul style="list-style-type: none"> ➤ Poles of advanced research institutes and Universities in the eligible area and at the edge of the eligible area(e.g. Timis, Belgrade) ➤ Existence of poles of excellence and success stories, (e.g. Timiș, Vrșac) in area of RTD 	<ul style="list-style-type: none"> ➤ Low rates of university education attainments among adult population in some districts. ➤ Weak performance of primary and secondary educational systems which impacts on the quality of education 	<ul style="list-style-type: none"> ➤ Involvement of Vojvodina and Timiș in European strategies for smart specialization ➤ Danube region strategy generating opportunities of partnerships for innovation 	<ul style="list-style-type: none"> ➤ Declining student population due to negative demographic trends, reducing availability of educational services, especially in remote areas. ➤ Financial crisis leading to reduction of investments in public education in remote

Sector	Strengths	Weaknesses	Opportunities	Threats
		<ul style="list-style-type: none"> ➤ Unequal access to ICT, digital divide in remote rural areas ➤ Poor availability of educational services, especially in remote areas 		<p>areas which are not attractive for private entities</p>
<p>Local institutions and civil society</p>	<ul style="list-style-type: none"> ➤ Strong involvement of civil society groups in cross border partnerships ➤ Existing private and public networks, offering the possibility of cooperation in several thematic areas, education and culture, etc.) ➤ Tradition of cross border exchanges in the past 	<ul style="list-style-type: none"> ➤ Administrative burdens and limited capacities in public institutions limiting cross border interactions ➤ Difficulties and delays in implementation of projects under the current programming period, creating obstacles for new partnerships and project generation 	<ul style="list-style-type: none"> ➤ Improving economic ties between Romania and Republic of Serbia 	<ul style="list-style-type: none"> ➤ Low level of support from the national authorities or no national policies to support the creation of cross-border partnerships

Identification of the main challenges and untapped potentials

Based on the findings of the SWOT several strategic responses were formulated using the “forward linkages” method. This method identifies four types of responses as outlined below:

- **growth accelerating/expansionary responses**, combining strengths and opportunities and aiming e.g. at socio-economic growth acceleration and the exploitation of comparative advantages;
- **structures adjustment responses**, combining weaknesses and opportunities, aiming at the engagement of structural deficits and the sustainability of socio-economic growth;
- **stabilization responses**, combining strengths and threats, aiming at neutralizing or compensating negative trends and processes beyond the control of the region;
- **preventive responses**, combining threats and weaknesses, aiming at the precaution and mitigation of negative developments which affect economic growth.

Basic policy formulation based on the SWOT findings

	Strengths	Weaknesses
Opportunities	Growth accelerating/ expansionary responses	Adjustment responses
Threats	Stabilization responses	Preventive responses

Source: own illustration

CBC programmes, being territorial and integrative, usually embraces a combination of responses. However the method described above has been used for the systemic definition and delimitation of main challenges and untapped potentials used as a basis for the strategy to be defined.

1.1.2. Justification for the selection of thematic priorities

Table 1

Selected thematic priority	Analysis of relevance for the programme and Justification for selection
a. Promoting Employment, labour mobility and social and cultural inclusion across the border	The Thematic Priority is highly relevant since it combines important conditions for the stabilisation of the population and the realisation of sustainable development by addressing attractive employment opportunities, provision of health and social services and inclusive society. Cross-border activity in these fields has been increasing in the last years and this trend is expected to accelerate.
b. Protecting the environment, promoting climate change adaptation and mitigation, risk prevention and management	The Thematic Priority is highly relevant since the protection of the environment and the elimination and mitigation of existing environmental hotspots and hazards and the adaptation for new risks is considered an absolute prerequisite for any development plan. Environmental protection and risk management are by definition cross-border.
c. Promoting sustainable transport and improving public infrastructure	The Thematic Priority is highly relevant since functioning, efficient and environmental friendly mobility and transport infrastructure as well as public utility infrastructure are absolute prerequisites for an inclusive, attractive and balanced programme area. The CBC dimension is underlined by the need for improved cross-border concentricity and by the need to adjust infrastructure to performance standards, available funds and demographic change.
d. Encouraging tourism and cultural and natural heritage	The Thematic Priority is highly relevant since the natural and cultural potential of the area is a significant comparative advantage of the area and an important development asset stretching across the border. CBC projects can help achieve critical mass and demonstrate immediate effects.

The priorities of the programme:

According to the results of the analysis and the identified needs and challenges, and based on the lesson learned from the current programme, four priorities have been established, each of one connected to one thematic objective:

- 1- Employment promotion and basic services strengthening for an inclusive growth (thematic objective a)**
- 2- Environmental protection and risk management (thematic objective b)**
- 3- Sustainable mobility and accessibility (thematic objective c)**
- 4- Attractiveness for sustainable tourism (thematic objective d)**

Expected contribution of the chosen priorities to the objectives of EU 2020 Agenda

Appraisal of relation between challenges and needs and objectives for smart, sustainable and integrative growth

European targets	Current progress in RO	Current progress in RS ⁸	Current status in the RO -RS programme area	Contribution by the strategy of the programme
75% of the population aged 20-64 to be employed	63.8%, (2012)	45,3 ⁹ (2012)	Overall the situation is similar to the national levels in the eligible area. At county/district level there are big inequalities between Timis county and Mehedinti in RO and Branicevski and South Banat in RS.	Significant. Priority 1 promotes employment, joint actions for the efficiency and access to labour market by disadvantaged groups
3% of GDP to be invested in R&D	0.48% (2011)	0,73 % ¹⁰	In the eligible area the situation is similar to the national levels, lower in the districts/ counties lagging behind, stronger in Timis county, with the highest concentration of research centres	Indirect but significant. Priority 2 and 3 environment and mobility promote innovation projects that will catalyze investments in R& D.
Reduction of greenhouse gas emissions with 20% (compared to 1990 level) ¹¹	51.84%	22.19% (1990-1998)	Greenhouse gas emissions are reduced on the one side based on the population and economic activities trends. However major contributors such obsolete industrial complexes and intense agriculture are operating.	Indirect but significant. Priority 3 promotes innovation for sustainable transport systems, in particular water ways in the Danube system

⁸ Serbia, as candidate country has not established quantitative targets, current progress in the strategic areas are described according to available information, with direct and secondary, indirect indicators.

⁹ NIS Labour Force Survey 2012 published by the Statistical Office of the Republic of Serbia page 15

¹¹ European Commission, (2014), SERBIA 2013 PROGRESS REPORT Accompanying the document COMMUNICATION FROM THE COMMISSION TO THE EUROPEAN PARLIAMENT AND THE COUNCIL Enlargement Strategy and Main Challenges 2013-2014, Brussels Ministry of Environment and Spatial Planning, (2010), Initial National Communication of the Republic of Serbia under the United Nations Framework Convention On Climate Change, Belgrade

European targets	Current progress in RO	Current progress in RS ⁸	Current status in the RO -RS programme area	Contribution by the strategy of the programme
20% of total energy consumption from renewable energy sources (RES)	20.79% (2012)	26.5% (2011)	Large hydro-electric power units exist on the Danube, shared between the two countries and produce a significant share of the total production from renewable sources, and of the total electricity production. The Romanian units produce 35%-40% of Romania's RES; the Serbian units produce 20-25% of total Serbian electricity).	Significant. Direct effects due to priority 2 actions, in Energy efficiency, usage of geothermal hot springs, water, sun and wind power.
Reduction of 10 Mtoe (20%) in the primary energy consumption	16.6% (2012)	-15% (1990-1998), stabilised trend	Primary energy consumption partially reduced due to population trends and sporadic building and industry energy efficiency measures. However new lifestyles increase the per capita consumption.	Indirect effect. Projects under priority 2 and 4 dedicated to improvement of energy efficiency
Less than 10% of children should leave school at an early age	17.4% (2012)	According to UN surveys 91% of children attended primary schools in Serbia in 2007, 78% attended secondary schools.	In the eligible area the access to primary schools is similar to what observed at national level, in both countries. A significantly lower percentage could be observed among Roma children ¹² .	Direct effects due to the impact on disadvantaged groups and poverty of projects under priority 1.
At least 40% of 30-34-year-olds	21.8% (2012)	6.5% of the total population has a third grade, 4.5%	In the eligible area the situation is relatively worse than the national average, especially in the most lagging behind areas and for Roma minority.	Indirect effects due to the increase of demand of high profile jobs in innovative sectors: environmental technologies, cultural services.

¹² World data on Education UN International bureau of education. 2014. <http://www.ibe.unesco.org/en/services/online-materials/world-data-on-education.html>

European targets	Current progress in RO	Current progress in RS ⁸	Current status in the RO -RS programme area	Contribution by the strategy of the programme
should complete third level education. EU average 24.285% in 2008. ¹³		have higher schools degree population aged 25-64, with tertiary ed.: 12.47%		
20 Million (580,000 in RO) less people should be at risk of poverty or exclusion (compared to 2008 levels)	240,000 (2011)	People at risk of poverty 17.9% in 2008 to 24.6% in 2012. Poverty risk rate in 2008 (17.9% vs 23.4%) in 2012 (24.6% vs 22.6%). ¹⁴	The problem of poverty and social exclusion intensified in Serbia in the last years influenced by the world economic crisis. The situation in the eligible area is similar to the national situation. The majority of poor citizens is concentrated in rural areas. A reduction of poverty rates in Central Serbia between 2007 and 2010 can be observed, partially due to revision of meta data definition	Indirect effects due to the improvement of living conditions and job opportunities created in priority axes 1, 3, 4

1.2. Justification for the financial allocation

The financial allocation to each Priority was defined taking into consideration some basic criteria, and using the information and feedback received from the consultation with the stakeholders:

- The proportionality to the challenges and needs emerged in the analysis of the eligible area and addressed by each priority;
- The project generation potential, estimated on the basis of the lessons learned from the previous programming period;
- The expected financial size of the operations proposed, taking into account the technical content, the physical size, the territory targeted, the number and/ or the typology of target groups considered;
- The project ideas and proposals collected during the consultations for programming with stakeholders and programme partners, especially for strategic projects;

The financial allocation per Priority Axis is as follows:

- **Priority Axis 1 (TP a) Employment promotion and services for an inclusive growth** - the planned IPA allocation to Priority Axis 1 is € 15.460.624 EUR, corresponding to 20,64% of the total IPA funds.

The allocation is based on three main justifications:

- The local stakeholders proved a strong capacity to generate projects during the previous programming period, in the fields of the cooperation for social inclusion projects, health care services, cultural cooperation, and the experiences will be surely capitalized in the next programming period;
- Some of the actions proposed may include investments in infrastructure and equipment, with costs larger than those for soft actions;
- The actions proposed can produce relevant impact in all communities in the eligible areas, and the number of projects proposals expected is very large;

The financial allocation to this priority is in line with the emphasis given within the eligible area and also with the demand from the base as expressed during the period 2007-2013 and within the consultations during programming.

- **Priority Axis 2 (TP b): Environmental protection and risk management** the planned IPA allocation to Priority Axis 2 is € 17.977.500 EUR, corresponding to 24% of the total IPA funds.

The allocation is based on three main justifications:

- Some of the actions proposed may include investments in infrastructure and equipment, with costs larger than those for soft actions;
- The partners have already produced a large portfolio of strategic projects ideas which include investments in infrastructure and technologies;
- The Priority Axis can support some strategic actions that will be particularly relevant for the coordination with the EUSDR;

The financial allocation within this Priority Axis is justified by the actions envisaged in the pursuit of Specific Objective and also by the potentially cost-intensive outputs under Specific Objective.

- **Priority Axis 3 (TP c): Sustainable mobility and accessibility** the planned IPA allocation to Priority Axis 3 is € 17.977.500 EUR, corresponding to 24% of the total IPA funds.

The allocation is based on three main justifications:

- During the previous programming period the number of projects implemented in these fields was relatively lower than in other areas.
- However, the partners have produced a large portfolio of strategic projects ideas, which include investments in infrastructures, project designs for large infrastructures, regeneration of existing infrastructures.
- The Priority can support some strategic actions that will be particularly relevant for the coordination with the EUSDR strategy.

This financial allocation reflects the expected size of actions facing the needs to support

- **Priority Axis 4 (TP d) Attractiveness for sustainable tourism:** the planned IPA allocation to Priority Axis 4 is € 16.000.000 EUR, corresponding to 21,36% of the total IPA funds.

The allocation is lower than the average of the 4 priorities, based on three main justifications, that lead to the expectation of a large number of projects with a lower average cost than in other areas:

- During the previous programming period a significant number of projects were implemented in these fields, but the average costs of these projects was smaller than in other areas, especially because most of the projects consisted of “soft” activities.
- The Priority can support some actions that will be particularly relevant for the coordination with the EUSDR, but these actions most probably will consist of “soft” activities, rather than investments in infrastructure.

- **Priority Axis 5: technical assistance.** The allocation for technical assistance corresponds to the 10% of the total allocation.

The allocation is based on two main justifications:

- The experience of the current programming period, which proves that programme partners and potential beneficiaries need a strong support for the generation and implementation of projects, in order to avoid ineligible costs and to increase the overall absorption rate.
- The strategy for the new programme has identified ambitious objectives, including strategic projects and a strong coordination with regional and EU strategies (EUSDR).

The overall Programme budget comprises of **74.906.248** EUR (IPA contribution), respectively **88.124.996** EUR (total budget) as described in section 3.

Table 1 Overview of the investment strategy of the cooperation programme

Priority axis	Union support (in EUR)	Proportion (%) of the total Union support for the cooperation programme	Thematic priorities	Result indicators corresponding to the thematic priority
1	15,460,624	20.64	A	PA1, RI1,RI2
2	17,977,500	24	B	PA2, RI1,RI2
3	17,977,500	24	C	PA3, RI1,RI2,RI3
4	16,000,000	21.36	D	PA4, RI1,RI2,RI3
5	7,490,624	10	TA	PA5, RI1,RI2

2. SECTION 2 - PRIORITY AXES

SECTION 2.1. DESCRIPTION OF THE PRIORITY AXES (OTHER THAN TECHNICAL ASSISTANCE)

2.1. Priority Axis 1

2.1.1. Title and funding source

<i>ID of the priority axis</i>	1
<i>Title of the priority axis</i>	Employment promotion and basic services strengthening for an inclusive growth

<input type="checkbox"/> The entire priority axis will be implemented solely through financial instruments	
<input checked="" type="checkbox"/> The entire priority axis will be implemented solely through financial instruments set up at Union level	
<input type="checkbox"/> The entire priority axis will be implemented through community-led local development	

2.1.2. Fund, calculation basis for Union support and justification of the calculation basis choice

<i>Fund</i>	IPA
<i>Calculation basis (total eligible expenditure or</i>	Total eligible expenditure.

<i>public eligible expenditure)</i>	
<i>Justification of the calculation basis choice</i>	In order to promote and equally finance the non-public eligible sector.

2.1.3. The specific objectives of the thematic priority and expected results

<i>ID</i>	1-1
<i>Specific objective</i>	To enhance the potential of the programme area for an inclusive growth, improving availability of employment opportunities, access to the labour market and employment opportunities in the programme eligible area.
<i>The results that the partner States seek to achieve with Union support</i>	<p>The expected results from action of promotion of an efficient and inclusive labour market are the following:</p> <p>The active population will experience better access to the labour market, receiving more information on job opportunities.</p> <p>Adult training opportunities and assistance from professional associations will be offered in coordinated cross border networks. Tailored assistance for the access to job opportunities offered to young people completing educational cycle, young people not employed, not involved in training or educational activities.</p> <p>Disadvantaged groups, isolated communities in marginal areas will be offered support for the access to the labour market.</p> <p>Promotional actions for the access to the labour market among young active population, disadvantaged groups, unemployed, returning migrants will be available.</p> <p>Cooperation across the border will be established among public services, NGOs, local administrations for joint actions in support of the labour market.</p>

<i>ID</i>	1-2
<i>Specific objective</i>	To enhance the potential of the programme area for an inclusive growth, based on the improvement of quality of life to all residents on the two sides of the border through joint actions, especially for the improvement of the access of the population to modern and efficient health care services, social services, services supporting the access to primary education.
<i>The results that the partner States seek to achieve with Union support</i>	<p>Improvement of quality and accessibility of basic services, exploiting cross-border synergies and removing bottlenecks and constraints generated by remoteness and technological gaps.</p> <p>The resident population will have access to improved services, with more efficient structures and more accessible networks of services in the sectors of health care, and social services, including cultural and sport facilities. Vulnerable communities, due to remoteness or demographic structure will have ensured new services adapted to their specific needs.</p> <p>Disadvantaged groups will experience improved access to social services with specific actions of information and assistance. Cross border networks and platforms will be established in order to exploit synergies, and to share strategies for common needs of social inclusion. Cross border mobility of active population will be facilitated, with shared benefits to the local economic systems.</p>

<i>ID</i>	1-3
<i>Specific objective</i>	To enhance the potential of the programme area for an inclusive growth, Increasing cultural and social integration in the cross-border area promoting innovative services and networks, reducing the impact of constraints due to remoteness and marginalisation of border areas.
<i>The results that the partner States seek to achieve</i>	<p>The expected results from the actions for the creation of infrastructure and networks for social and cultural inclusion are the following:</p> <p>Creation of infrastructures for social and cultural inclusion.</p> <p>Establishment of partnerships for the promotion of a lively cultural environment, integrated across the border, ensuring integration of ethnic groups and inclusion of minorities and disadvantaged groups.</p>

<p><i>with Union support</i></p>	<p>Support to the access to tertiary education offered to young population by networks of tertiary education centres established across the border.</p> <p>Resident population will have access to cultural and social services integrated in cross border networks, facilitating cultural integration of ethnic groups, and cross border interaction.</p> <p>Disadvantaged groups will have opportunities to experience cultural services, with the support of innovative instruments, like social enterprises, non-profit groups. NGOs and non-profit local bodies active in cultural services on the two sides of the border will share good practices and innovative solutions for the improvement of the quality of cultural environment.</p>
----------------------------------	--

2.1.4. Elements of other thematic priorities added to the priority axis

Not applicable

2.1.5. Actions to be supported under the thematic priority (by thematic priority)

2.1.5.1. A description of the type and examples of actions to be supported and their expected contribution to the specific objectives, including, where appropriate, identification of the main target groups, specific territories targeted and types of beneficiaries

<p><i>Thematic Priority</i></p>	<p>Promoting Employment, labour mobility and social and cultural inclusion across the border through, inter alia: integrating cross-border labour markets, including cross-border mobility; joint local employment initiatives; information and advisory services and joint training; gender equality; equal opportunities; integration of immigrants' communities and vulnerable groups; investments for public employment services; support investments in public health and social services.</p>
<p>The indicative actions to be supported under the thematic priority a), Priority Axis 1:</p> <p>Thematic Area 1 "Employment and labour mobility":</p> <ul style="list-style-type: none"> • Set up of joint initiatives and smart growth mechanisms including cross border networks for the identification of potentials of 	

employment, including in the innovative sectors and the removal of obstacles to the access to adequate education, training and ultimately to the labor market by the target group including disadvantaged groups.

- Set up of joint initiatives, including integrated services targeting young people, to promote their access to the labour market;
- Set up of cross border initiatives for the capitalization of potentials and facilitation of cross border mobility in the local labor markets.
- Joint initiatives, cooperation, exchange of information/experience, coordination of activities and services among professional associations for the promotion of employment, vocational training and entrepreneurial initiatives, especially among young unemployed, women, disadvantaged groups.
- Development of cross-border services for adult trainings, assistance to job seekers, assistance to returning emigrants for the re-integration in the local labour market.

Thematic Area 2 "Health and social infrastructures":

- Set up of cross-border platforms and networks for planning and provision of health and social services, targeting also remote communities and disadvantaged groups.
- Joint studies and researches for the identification of innovative technological solutions for the organization of effective networks for basic services provision
- Set up of monitoring services for the identification of needs and the quantification of demands for new social and health services generated by demographic and social dynamics, like aging, and migration
- Development and modernization (including procurement of equipment) of public social services and centres;
- Construction, rehabilitation, modernization (including procurement of equipment) of health centres, hospitals and health services improvement;

Thematic Area 3 "Social and cultural inclusion":

- Set up of cross-border frameworks, and networks for the strengthening of the cross-border cultural exchange;
- Design cross-border actions for social, educational and cultural inclusion through innovative solutions such as social enterprises, voluntary organisations, special interest groups etc.

- Creation of partnerships for joint actions for the promotion of access to tertiary education, through information, mentoring and tutoring services offered specially to students completing secondary education.
- Investments in infrastructure and equipment for cross-border actions for sport, education and cultural activities, to facilitate and promote social inclusion.
- Joint actions for a better participation of all social groups, actors and users in the design and delivery of cultural services, educational services, childhood education, and services of general interest.
- Set up models and test pilot actions for the prevention of early school leaving, including among disadvantaged groups.
- Set-up of joint planning groups for cooperation between public services organizations;

Target groups of the Priority Axis:

- Population living in the eligible area;
- Unemployed, especially young people and women;
- Children and youth living in the eligible area;
- Disadvantaged groups.

Indicative types of beneficiaries

- Regional and local public authorities (County Councils, Local Councils/ Municipalities, etc.) and other public bodies;
- Offices - branches of National/Regional Public Authorities active on the themes of the priority in the eligible area (registered and functioning in the eligible area);
- Health care institutions;
- Educational institutions;
- Non - profit bodies and NGOs;
- Religious organizations, legally established according to the national legislation in force;
- Chambers of Commerce;
- Museums, cultural, sports, touristic institutions, etc;

2.1.5.2. Guiding principles for the selection of operations

<i>Thematic priority</i>	Promoting Employment, labour mobility and social and cultural inclusion across the border through, inter alia: integrating cross-border labour markets, including cross-border mobility; joint local employment initiatives;
--------------------------	--

	information and advisory services and joint training; gender equality; equal opportunities; integration of immigrants' communities and vulnerable groups; investments for public employment services; support investments in public health and social services.
--	---

The selection of projects will be carried out following a standardized assessment procedure using the following sets of criteria:

- **Strategic coherence:** this criterion examines the coherence and contribution of each project proposal to the relevant Specific Objective addressed the contribution to the envisaged results and the overall coherence of planned activities with the indicative types of actions.

Further the cross-border added value of the operation, its territorial dimension and the relevance of the partnership will also be assessed in this context.

- **Coherence with state aid rules:** any state aid that might be provided under this programme shall comply with the procedural and substantive State aid rules applicable at the time when the public support is granted.

-

- **Operational quality:** this criterion examines the design of the project proposal in relation to clarity and coherence of the operational objectives, activities and means, feasibility, efficiency, communication about the project and its results, potential for uptake and embedment into operative procedures of the partners involved.

- **Compliance with horizontal principles:** this criterion examines the consideration from the side of the project of the Programme horizontal principles and the demonstration of their integration and advancement within the project proposal intervention logic. The strategic coherence criterion basically examines the relevance of the project proposal, hence it retains primacy over the other two criteria.

Strategic projects (submitted): strategic projects will be selected through an open transparent procedure, based on specific selection criteria that will be defined according to the priority objectives.

The detailed assessment criteria will be laid down and made available to potential applicants in the calls for proposals documentation that will be approved by the programme bodies.

2.1.5.3. Planned use of financial instruments (where appropriate)

<i>Thematic priority</i>	Promoting Employment, labour mobility and social and cultural inclusion across the border through, inter alia: integrating cross-border labour markets, including cross-border mobility; joint local employment initiatives; information and advisory services and joint training; gender equality; equal opportunities; integration of immigrants' communities and vulnerable groups; investments for public employment services; support investments in public health and social services.
<i>Planned use of financial instruments</i>	Not applicable
No financial instruments will be used	

2.1.6. Common and programme specific indicators

(Reference: point (b)(ii) and (b)(iv) of Article 8(2) of Regulation (EU) No 1299/2013 and Article 2(2) of IPA II Implementing Regulation)

2.1.6.1. Priority axis result indicators (programme specific)

Table 1: Programme specific result indicators

ID	Indicator	Measurement unit	Baseline value	Baseline year	Target value (2023) ¹⁵	Source of data	Frequency of reporting
PA1 RI1	Active population experiencing improved access to labour market. (Innovative services assisting job seekers permanently established, information on job opportunities available in marginal areas, disadvantaged groups receiving assistance and information about job opportunities.	Ranking on qualitative scale (1-10)	The result of the first survey will be set as baseline	2015	Increase	Survey among stakeholders. Association of entrepreneurs, local administrators, NGOs, educational organizations	2015 2017 2020, 2023
PA1 RI2	Population experiencing access to improved basic services in health care and education.	Ranking on qualitative scale (1-10)	The result of the first survey will	2015	Increase	Survey among stakeholders. Local	2015 2017 2020 2023

¹⁵ Indicators Targets may be qualitative or quantitative.

	Innovative, high quality services permanently created and available in marginal areas, preventive care, cultural activities and services, sport activities.		be set as baseline			administrators, NGOs, health care centres, educational organizations.	
PA1 RI3	Population experiencing lively cultural life in a cross border setting. Population, especially in marginal areas, accessing various opportunities for cultural and social activities, permanently offered in joint initiatives across the border.	Ranking on qualitative scale (1-10)	The result of the first survey will be set as baseline	2015	Increase	Survey among target groups. Students, Cultural Organizations, NGOs, Sport Associations.	2015 2017 2020 2023

2.1.6.2. Priority axis output indicators (common or programme specific)

Table 2 Common and programme specific output indicators

ID	Indicator (<i>name of indicator</i>)	Measurement unit	Target value (2023)	Source of data	Frequency of reporting
PA1.OI1	Citizens involved in project activities in cultural, social health care services.	Units	at least 3000 ¹⁶	Monitoring system and projects reports	Annual
PA1.OI2	Cross border cooperation structures supported in the field of labour market.	Units	at least 20	Monitoring system and projects reports	Annual
PA1.OI3	Investment in health care and social services infrastructure.	Units	at least 5	Monitoring system and projects reports	Annual
PA1 OI4	Disadvantaged persons involved in projects activities.	Units	at least 2000	Monitoring system and projects reports	Annual
PA1OI5	Joint actions targeting vulnerable groups (youth, women) established for the prevention of early school leaving, for cultural inclusion	Units	at least 20	Monitoring system and projects reports	Annual
PA1OI6	Joint actions targeting smart (green) growth opportunities	Units	At least 10	Monitoring system and projects reports	Annual

¹⁶ To be defined after final decision on financial al location and project types.

2.1.7. Categories of intervention

Categories of intervention corresponding to the content of the priority axis, based on a nomenclature adopted by the Commission, and indicative breakdown of Union support

Tables 6-9: Categories of intervention

Table 3: Dimension 1 Intervention field

Priority axis	Code	Amount (EUR)
Priority axis 1 - Employment promotion and services for an inclusive growth	102 Access to employment for job-seekers and inactive people, including the long-term unemployed and people far from the labour market, also through local employment initiatives and support for labour mobility	3,865,156
	053 Health Infrastructures	7,730,312
	109 Active inclusion, including with a view to promoting equal opportunities and active participation, and improving employability	1,546,062
	116 Improving the quality and efficiency of, and access to, tertiary and equivalent education with a view to increasing participation and attainment levels, especially for disadvantaged groups	1,546,062

	113 Promoting social entrepreneurship and vocational integration in social enterprises and the social and solidarity economy in order to facilitate access to employment	773,031
Priority axis 2 - Environmental protection and risk management	085 Protection and enhancement of biodiversity, nature protection and green infrastructure	5,393,250
	087 Adaptation to climate change measures and prevention and management of climate related risks e.g. erosion, fires, flooding, storms and drought, including awareness raising, civil protection and disaster management systems and infrastructures	6,292,125
	088 Risk prevention and management of non-climate related risks	8,089,875
Priority axis 3 - Sustainable mobility and accessibility	021 Water management and drinking water conservation (including river basin management, water supply, specific climate change adaptation measures, district and consumer metering, charging systems and leak reduction)	2,696,625
	022 Waste water treatment	2,696,625
	041 Inland waterways and ports	7,191,000
	044 Intelligent transport systems (including the introduction of demand management, tolling systems, IT monitoring, control and information systems)	4,494,375

	046 ICT: High-speed broadband network	898,875
Priority axis 4 - Attractiveness for sustainable tourism	091 Development and promotion of the tourism potential of natural areas	3,200,000
	092 Protection, development and promotion of public tourism assets	4,800,000
	093 Development and promotion of public tourism services	3,200,000
	094 Protection, development and promotion of public cultural and heritage assets	4,800,000

Table 4: Dimension 2 Form of finance

2.1.8. A summary of the planned use of technical assistance including, where necessary, actions to reinforce the administrative capacity of authorities involved in the management and control of the programmes and beneficiaries and, where necessary, actions for to enhance the administrative capacity of relevant partners to participate in the implementation of programmes (where appropriate)

<i>Priority axis</i>	Employment promotion and basic services strengthening for an inclusive growth
<p>Capacity building initiatives:</p> <ul style="list-style-type: none"> • For project generation, assisting potential beneficiaries for the identification of needs among target groups, coordination of administrative activities for establishment of partnerships • Procedures for the establishment of cross border partnerships; • For procurement procedures management; <p>Promotion initiatives:</p> <ul style="list-style-type: none"> • To activate participation among local administrations in remote areas, NGOs; • To inform the potential beneficiaries on the financing opportunities from the Programme; • To inform target groups on outputs of the programme; <p>Surveys and evaluation activities:</p> <ul style="list-style-type: none"> • Surveys among target groups to set baseline for the indicators and to monitor the impact of priority; • Programme evaluations. 	

2.2. Priority Axis 2

2.2.1. Title and funding source

<i>ID of the priority axis</i>	2
<i>Title of the priority axis</i>	Environmental protection and risk management

<input type="checkbox"/> The entire priority axis will be implemented solely through financial instruments	
<input checked="" type="checkbox"/> The entire priority axis will be implemented solely through financial instruments set up at Union level	
<input type="checkbox"/> The entire priority axis will be implemented through community-led local development	

2.2.2. Fund, calculation basis for Union support and justification of the calculation basis choice

<i>Fund</i>	IPA
<i>Calculation basis (total eligible expenditure or public eligible expenditure)</i>	Total eligible expenditure
<i>Justification of the calculation basis choice</i>	In order to promote and equally finance the non-public eligible sector.

2.2.3. The specific objectives of the thematic priority and expected results

<i>ID</i>	2-1
<i>Specific objective</i>	Enhancing protection and sustainable use of natural resources, the improvement of capacity and the extension of actions of organisations and bodies involved in environmental protection and sustainable use of natural resources. Promoting cross border networks for education and studies on environmental resources.
<i>The results that the partner States seek to achieve with Union support</i>	<p>Public organizations of the two sides of the border establishing permanent networks and partnerships for the monitoring and management of environmental resources.</p> <p>Inhabitants, better informed on the quality and vulnerability of natural resources, becoming proactive subjects in the field of environmental protection.</p> <p>Education on environmental protection actions and methodologies improved, with the establishment of cross-border initiatives. Knowledge on environmental resources improved with cross border partnerships.</p> <p>Managerial and technological innovations for the environmental protection tailored to the local needs, with the exchange of knowledge and experiences in the two sides of the border and transferred to the local administrations.</p> <p>Local and national bodies actively integrated in the strategies for the protection and promotion of environmental resources in the Danube Basin Macro Region.</p> <p>Enhancement of the capacity of local institutions to protect and promote natural resources, through the creation or the rehabilitation of infrastructures and equipment for the provision of innovative services in the field.</p>

<i>ID</i>	2-2
<i>Specific objective</i>	To enhance capacity to face environmental risks, enabling cross-border interoperability and joint actions for innovative systems of environmental protection, mitigation and prevention of environmental accidents and disasters, emergency reaction, preparedness and awareness in case of environmental emergencies.
<i>The results that the partner States seek to achieve with Union support</i>	<p>Environmental risks management and emergency preparedness.</p> <p>Improvement of cross-border interoperability of organisations and bodies involved in disaster resilience and disaster management systems and emergency preparedness.</p> <p>Increase of the capacity of local administrations and public bodies competent for early cross-border identification and assessment of the situation in case of environmental accidents and natural disasters, and joint environmental protective actions.</p> <p>Local and national bodies active in the area better integrated in the Danube Basin International systems and organizations for the management of environmental risks and emergencies.</p> <p>Improvement of the capacity of local institutions to play an active and efficient role in interventions for environmental emergencies, due to natural events or industrial accidents, through the creation or rehabilitation of infrastructure and equipment.</p>

2.2.4. Elements of other thematic priorities added to the priority axis

Not applicable

2.2.5. Actions to be supported under the thematic priority (by thematic priority)

2.2.5.1. A description of the type and examples of actions to be supported and their expected contribution to the specific objectives, including, where appropriate, identification of the main target groups, specific territories targeted and types of beneficiaries

<i>Thematic Priority</i>	Protecting the environment, promoting climate change adaptation and mitigation, risk prevention and management through, inter alia: joint actions for environmental
--------------------------	---

	<p>protection; promoting sustainable use of natural resources, resource efficiency, renewable energy sources and the shift towards a low-carbon economy; promoting investments to address specific risks, ensuring disaster resilience and developing disaster management systems and emergency preparedness.</p>
--	---

The indicative actions to be supported under the thematic priority b), Priority Axis 2:

Thematic Area 1: “Environmental protection and sustainable use of natural resources”

- Set up of cross-border frameworks, platforms and networks for the exchange of experience and the identification of needs for entities involved or interested in environmental protection;
- Development of joint training and actions, including awareness programmes for relevant organisations and the general public, including educational institutions in the field of environmental protection and use of natural resources;
- Establishment and enhancement of cross border partnerships and networks in the field of natural resources, biodiversity, technologies for environmental protection, for the identification and transfer of innovations tailored to the local needs.
- Establishment and enhancement of cross border partnerships and networks in the field of energy efficiency, renewable energy, such as usage of geothermal hot springs, water, sun and wind power, including investments in infrastructure and equipment based on common and tailored technical solutions;
- Investment in infrastructure and equipment for environmental protection and use of natural resources;
- Establishment of networks and partnerships for joint training actions for public entities and local communities in the field of environmental protection, enhancement of pollution control strategies and systems; conduction of joint trainings and maintenance of interoperability including the purchase of compatible equipment;
- Joint initiatives and investments in infrastructure and equipment for the implementation of technologies for the control of pollution and rehabilitation of rivers and brown fields and industrial areas with common problems on the two sides of the border;
- Restoration of natural areas (e.g. woods and river banks) to prevent floods and land slides;

- Joint activities for the protection of endangered species.

Thematic Area 2: “Environmental risks management and emergency preparedness”

- Development of joint structures and partnerships for the integration of the involved entities on initiatives in relation to the EUSDR (Danube River Basin Management, ICPDR initiatives, European Floods Alert System etc.), including investments in infrastructure and equipment;
- Establishment and enhancement of cross border liaison in the environmental planning of the involved entities including joint risk mapping of accident risk spots, risk assessment and evaluation exercises;
- Ensuring and promotion of data availability and the integration of management approaches in national and international networks;
- Establishment of networks and partnerships for joint training actions for public entities and local communities in the field of management of environmental emergencies; joint trainings and maintenance of interoperability including the purchase of compatible equipment;
- Establishment of joint services for the management and control of risks generated by hot spots of industrial pollution;
- Joint actions dedicated to preparing children/ youth to respond to emergency situations, including i.e. school camps, trainings;
- Investments in infrastructure and equipment for risk management and emergency preparedness.

Target groups of the Priority Axis:

- Population living in the eligible area
- Unemployed, especially young people and women
- Children and youth living in the eligible area
- Disadvantaged groups.

Indicative types of beneficiaries

- Regional local and public authorities (County Councils, Local Councils/ Municipalities, etc.) and other public bodies;
- Offices - branches of National/Regional Public Authorities active on the themes of the priority in the eligible area (registered and functioning in the eligible area);
- Health care institutions;
- Educational institutions;
- Non - profit bodies and NGOs;

- Religious organizations, legally established according to the national legislation in force;
- Chambers of Commerce;
- Museums, cultural, sports, touristic institutions;

2.2.5.2. *Guiding principles for the selection of operations*

<i>Thematic priority</i>	Protecting the environment, promoting climate change adaptation and mitigation, risk prevention and management through, inter alia: joint actions for environmental protection; promoting sustainable use of natural resources, resource efficiency, renewable energy sources and the shift towards a low-carbon economy; promoting investments to address specific risks, ensuring disaster resilience and developing disaster management systems and emergency preparedness.
<p>The selection of projects will be carried out following a standardized assessment procedure using the following sets of criteria:</p> <ul style="list-style-type: none"> • Strategic coherence: this criterion examines the coherence and contribution of each project proposal to the relevant Specific Objective addressed the contribution to the envisaged results and the overall coherence of planned activities with the indicative types of actions. Further the cross-border added value of the operation, its territorial dimension and the relevance of the partnership will also be assessed in this context. • Coherence with state aid rules: any state aid that might be provided under this programme shall comply with the procedural and substantive State aid rules applicable at the time when the public support is granted. • Operative quality: this criterion examines the design of the project proposal in relation to clarity and coherence of the operational objectives, activities and means, feasibility, efficiency, communication about the project and its results, potential for uptake and embedment into operative procedures of the partners involved. • Compliance with horizontal principles: this criterion examines the consideration from the side of the project of the Programme horizontal principles and the demonstration of their integration and advancement 	

within the project proposal intervention logic. The strategic coherence criterion basically examines the relevance of the project proposal, hence it retains primacy over the other two criteria.

Strategic projects (submitted): strategic projects will be selected through an open transparent procedure, based on specific selection criteria that will be defined according to the priority objectives.

The detailed assessment criteria will be laid down and made available to potential applicants in the calls for proposals documentation that will be approved by the programme bodies.

2.2.5.3. Planned use of financial instruments (where appropriate)

<i>Thematic priority</i>	Protecting the environment, promoting climate change adaptation and mitigation, risk prevention and management through, inter alia: joint actions for environmental protection; promoting sustainable use of natural resources, resource efficiency, renewable energy sources and the shift towards a low-carbon economy; promoting investments to address specific risks, ensuring disaster resilience and developing disaster management systems and emergency preparedness.
<i>Planned use of financial instruments</i>	Not applicable
No financial instruments will be used	

2.2.6. Common and programme specific indicators

2.2.6.1. Priority axis result indicators (programme specific)

Table 7: Programme specific result indicators

ID	Indicator	Measurement unit	Baseline value	Baseline year	Target value (2023) ¹⁷	Source of data	Frequency of reporting
PA2-RI 1	Awareness on the potential of environmental resources and the benefits of protection. Resident population informed on quality and quantity of environmental resources in the eligible area, and on the benefits of protection actions.	Qualitative indicator on Ordinal scale value (1 /10)	The result of the first survey will be set as baseline	2015	Increase	Survey among stakeholders. Youth, residents in areas close to natural resources and environmental hotspots.	2017 2020 2023

¹⁷ Target values may be qualitative or quantitative.

PA2. RI1	Capacity for emergency interventions and management in case of natural disasters and environmental accidents	Qualitative indicator Ordinal scale value (1-10)	The result of the first survey will be set as baseline	2015	Increase	Survey among stakeholders. Institutions for environmental protections, NGOs, local administrations, educational institutions.	2017 2020 2023
PA2. RI2	Potential for cross-border interoperability for environmental protection and emergency interventions, based on shared procedures and technologies	Qualitative indicator Ordinal scale value (1-10)	The result of the first survey will be set as baseline	2015	Increase	Survey among stakeholders. Institutions for environmental protections, NGOs, local administrations, educational institutions.	2017 2020 2023

2.2.6.2. Priority axis output indicators (common or programme specific)

Table 8: Common and programme specific output indicators

ID	Indicator (<i>name of indicator</i>)	Measurement unit	Target value (2023)	Source of data	Frequency of reporting
PA2.OI1	Infrastructure, equipment built/ installed/ modernized in the field of cross border services for environmental protection	Units (No)	at least 10 ¹⁸	Monitoring	Annual
PA2.OI2	Participants to project initiatives and events for information and awareness rising	Units (No)	at least 5.000	Monitoring	Annual
PA2OI3	Studies in the field of environmental protection and emergency management. (technical and scientific studies,	Units	at least 5	Monitoring	Annual

¹⁸ To be defined after final decision on financial allocations

	researches in the relevant fields)				
PA2.OI4	Participants to capacity building initiatives	units (No)	at least 200	Monitoring	Annual
PA2.OI5	Monitoring systems established/ extended/ modernized in the eligible area in the field of environmental protection and emergency management.	Units	at least 3	Monitoring	Annual

2.2.7. Categories of intervention

Categories of intervention corresponding to the content of the priority axis, based on a nomenclature adopted by the Commission, and indicative breakdown of Union support

Tables 12-15: Categories of intervention

Table 9: Dimension 1 Intervention field

Priority axis	Code	Amount (EUR)
Priority axis 1 - Employment promotion and services for an inclusive growth	102 Access to employment for job-seekers and inactive people, including the long-term unemployed and people far from the labour market, also through local employment initiatives and support for labour mobility	3,865,156
	053 Health Infrastructures	7,730,312
	109 Active inclusion, including with a view to promoting equal opportunities and active participation, and improving employability	1,546,062
	116 Improving the quality and efficiency of, and access to, tertiary and equivalent education with a view to increasing participation and attainment levels, especially for disadvantaged groups	1,546,062

	113 Promoting social entrepreneurship and vocational integration in social enterprises and the social and solidarity economy in order to facilitate access to employment	773,031
Priority axis 2 - Environmental protection and risk management	085 Protection and enhancement of biodiversity, nature protection and green infrastructure	5,393,250
	087 Adaptation to climate change measures and prevention and management of climate related risks e.g. erosion, fires, flooding, storms and drought, including awareness raising, civil protection and disaster management systems and infrastructures	6,292,125

2.3. Priority Axis 3

2.3.1. Title and funding source

<i>ID of the priority axis</i>	3
<i>Title of the priority axis</i>	Sustainable Mobility and Accessibility

<input type="checkbox"/> The entire priority axis will be implemented solely through financial instruments	
<input checked="" type="checkbox"/> The entire priority axis will be implemented solely through financial instruments set up at Union level	
<input type="checkbox"/> The entire priority axis will be implemented through community-led local development	

2.3.2. Fund, calculation basis for Union support and justification of the calculation basis choice

<i>Fund</i>	IPA
<i>Calculation basis (total eligible expenditure or public eligible expenditure)</i>	Total eligible expenditure
<i>Justification of the calculation basis choice</i>	In order to promote and equally finance the non-public eligible sector.

2.3.3. The specific objectives of the thematic priority and expected results

<i>ID</i>	3
<i>Specific objective</i>	Promote the achievement of improved and homogenous quality standard in public transport, especially in remote areas through improved sustainability and efficiency of transport infrastructure and mobility services within the cross-border area and the area's integration in the main EU transport corridors.
<i>The results that the partner States seek to achieve with Union support</i>	<p>Mobility and transport infrastructures and services improved and more sustainable.</p> <p>Improvement of cross border mobility, security and integration;</p> <p>Improvement of accessibility of remote marginal areas;</p> <p>Enhancement of integration of local transport infrastructures and services in the main European transport corridors, especially the water ways connected to the Danube corridor;</p> <p>Production of feasibility analysis on key transport infrastructures, improving regional national and international connection to transport networks, enabling the regional and national authorities to integrate CBC strategies in National, macro-regional and European transport strategies.</p> <p>Population in the area experiencing improved accessibility to local and external destinations, through improved services and or improved infrastructure, with lower environmental impact;</p> <p>Population commuting across the border for economic and social, cultural activities experiencing improved services for border crossing, due to improved technologies and infrastructure;</p> <p>Tourist mobility improved and extended in the area, based on new services, and infrastructure;</p>

<i>ID</i>	3-2
<i>Specific objective</i>	Promote the achievement of improved and homogenous quality standard in public infrastructures for basic services, especially in

	remote areas through improved and enlarged access to modern and efficient public utilities services (incl. Internet, energy)
<i>The results that the partner States seek to achieve with Union support</i>	<p>Public utilities infrastructures and networks</p> <ul style="list-style-type: none"> • Creation of the improved accessibility to state-of-the-art and efficient public utilities (access to internet, utilities: waste, water, energy) in the light of technological options, economic constraints, environmental requirements and demographic changes; • Establishment of cross border partnerships for the implementation of innovative solutions for the access to public services, especially for remote areas and marginalized communities; • Population experiencing improved access to public utilities and services, based on innovative solutions shared across the border; • Remote areas receiving tailored assistance to facilitate removal of obstacles to the access to IT services and public utilities; • Disadvantaged groups enabled to easier access to utility and services, with targeted information and awareness rising actions;

2.3.4. Elements of other thematic priorities added to the priority axis

Not applicable

2.3.5. Actions to be supported under the thematic priority (by thematic priority)

2.3.5.1. *A description of the type and examples of actions to be supported and their expected contribution to the specific objectives, including, where appropriate, identification of the main target groups, specific territories targeted and types of beneficiaries*

<i>Thematic Priority</i>	Promoting sustainable transport and improving public infrastructures by way of, inter alia: reducing isolation through improved access to transport, information and communication networks and services; investing in cross-border water, waste and energy systems and facilities.
--------------------------	---

Indicative actions to be supported under thematic priority c), Priority Axis 3:

Thematic Area 1: “Mobility and transport infrastructure and services”

- Establishment and enhancement of cross-border partnerships of the relevant authorities for the planning physical infrastructure;
- Joint studies for the preparation of cross-border infrastructure investments with emphasis on multimodal solutions;
- Construction/ rehabilitation/ widening of the cross-border crossing points and/ or the road infrastructure leading to the cross-border crossing points;
- Improvement/ acceleration of procedures linked to mobility of persons and goods within the eligible area;
- Construction/ rehabilitation/ widening of cross-border roads connecting settlements alongside the border and/or small remote villages with main road, which leads to the border;
- Construction/ rehabilitation/ widening of roads linking to the national/ international systems as well as to economic sites of cross-border interest;
- Construction/ rehabilitation/ widening Rehabilitation/ widening of roads connecting settlements within the eligible area;
- Creation, rehabilitation/ modernization of information/promotion centres on cross-border economic cooperation;
- Development and implementation of an integrated and environmentally friendly cross-border transport connections;
- Creation of public cross-border cooperation networks;
- Creation or modernization of cross-border logistics facilities/ centres;
- Development of inter-modal transport services within the eligible area;
- Development of transport on the Danube and on other rivers within the eligible area, including investments in infrastructure and purchase of equipment for ports and water related mobility
- Construction/ rehabilitation/ widening of the road infrastructure and cross-border crossing points;

Thematic Area 2: “Public utilities infrastructure“

- Set up cross-border frameworks, platforms and networks for the exchange of experience and the identification of needs for public services organizations/service providers Development and implementation of locally adapted solutions for investments in public utilities infrastructure (e.g. small-scale water treatment, access to ICT,

renewable energy) within the areas facing similar challenges on both sides of the border;

- Creation of necessary internet infrastructure for cross-border cooperation networks;
- Studies for cooperation with the scope of better resources usage for improving public services/utility delivering;
- Support cooperation among public services organizations;

Target groups of the Priority:

- Population living in the eligible area
- Unemployed, especially young people and women
- Children and youth living in the eligible area
- Disadvantaged groups.
- Tourists and business travelers
- Enterprises located in the area.

Indicative types of beneficiaries

- Regional and local and public authorities (County Councils, Local Councils/ Municipalities, etc.) and other public bodies;
- Offices - branches of National/Regional Public Authorities active on the themes of the priority in the eligible area (registered and functioning in the eligible area);
- Health care institutions;
- Educational institutions;
- Non - profit bodies and NGOs;
- Religious organizations, legally established according to the national legislation in force;
- Chambers of Commerce;
- Museums, cultural, sports, touristic institutions, etc;

2.3.5.2. Guiding principles for the selection of operations

<i>Thematic priority</i>	Promoting sustainable transport and improving public infrastructures by way of, inter alia: reducing isolation through improved access to transport, information and communication networks and services; investing in cross-border water, waste and energy systems and facilities.
--------------------------	---

The selection of projects will be carried out following a standardized assessment procedure using the following sets of criteria:

- **Strategic coherence:** this criterion examines the coherence and contribution of each project proposal to the relevant Specific Objective addressed the contribution to the envisaged results and the overall coherence of planned activities with the indicative types of actions.
Further the cross-border added value of the operation, its territorial dimension and the relevance of the partnership will also be assessed in this context.
- **Coherence with state aid rules:** any state aid that might be provided under this programme shall comply with the procedural and substantive State aid rules applicable at the time when the public support is granted.
- **Operative quality:** this criterion examines the design of the project proposal in relation to clarity and coherence of the operational objectives, activities and means, feasibility, efficiency, communication about the project and its results, potential for uptake and embedment into operative procedures of the partners involved.
- **Compliance with horizontal principles:** this criterion examines the consideration from the side of the project of the Programme horizontal Principles and the demonstration of their integration and advancement within the project proposal intervention logic. The strategic coherence criterion basically examines the relevance of the project proposal, hence it retains primacy over the other two criteria.

Strategic projects (submitted): strategic projects will be selected through an open transparent procedure, based on specific selection criteria that will be defined according to the priority objectives.

The detailed assessment criteria will be laid down and made available to potential applicants in the calls for proposals documentation that will be approved by the programme bodies.

2.3.5.3. *Planned use of financial instruments (where appropriate)*

<i>Thematic priority</i>	Promoting sustainable transport and improving public infrastructures by way of, inter alia: reducing isolation
--------------------------	--

	through improved access to transport, information and communication networks and services; investing in cross-border water, waste and energy systems and facilities.
<i>Planned use of financial instruments</i>	Not applicable
No financial instruments will be used	

2.3.6. Common and programme specific indicators

2.3.6.1. Priority axis result indicators (programme specific)

Table 10: Programme specific result indicators

ID	Indicator	Measurement unit	Baseline value	Baseline year	Target value (2023) ¹⁹	Source of data	Frequency of reporting
PA3. RI1	Population accessing to sustainable and efficient public mobility and transport services. Population having access to improved local transport infrastructures, faster connections to main corridors, efficient border crossing services, transport services using innovative technologies.	Qualitative indicator described on an ordinal scale (1-10)	The result of the first survey will be set as baseline	2015	Increase	Survey among stakeholders.	2017 2020 2023
PA3 RI2	Vehicles crossing the border.	Total number of vehicles per day	950	2013	Increase	NIS, Border police statistics.	2017 2020

¹⁹ Target values may be qualitative or quantitative.

	Traffic across the border for social, commercial and touristic activities and exchanges.					Romania and Serbia	2023
PA3. RI3	Population accessing sustainable and efficient public utilities networks (energy, water, ICT). Access to improved utility services based on innovative technologies, access to efficient and sustainable energy sources, especially in marginal and remote territories.	Qualitative indicator described on an ordinal scale (1-10)	The result of the first survey will be set as baseline	2015	Increase	Survey among stakeholders.	2017 2020 2023

2.3.6.2. *Priority axis output indicators (common or programme specific)*

Table 11: Common and programme specific output indicators

ID	Indicator (<i>name of indicator</i>)	Measurement unit	Target value (2023)	Source of data	Frequency of reporting
PA3.OI1	Cross border cooperation structures supported in the field of transport and public utilities	Units (No)	10	Monitoring	Annual
PA3.OI2	Studies related to the implementation of selected projects or the realisation of actions in the field of transport and mobility infrastructure	Units (No)	5	Monitoring	Annual
PA3.OI3	Investments in transport and utilities infrastructure, including improvement, enhancement of existing infrastructure	Units (No)	7	Monitoring	Annual
PA3.OI4	Participants to information/ training/ awareness raising initiatives in the field of transport and public utilities.	Units (No)	1000	Monitoring	Annual
PA3.OI5	Joint initiatives on improvements of public transport and intermodal connections	Units (No)	5	Monitoring	Annual

2.3.7. Categories of intervention

Categories of intervention corresponding to the content of the priority axis, based on a nomenclature adopted by the Commission, and indicative breakdown of Union support

Tables 18-21: Categories of intervention

Table 12 Dimension 1 Intervention field

Priority axis	Code	Amount (EUR)
Priority axis 1 - Employment promotion and services for an inclusive growth	102 Access to employment for job-seekers and inactive people, including the long-term unemployed and people far from the labour market, also through local employment initiatives and support for labour mobility	3,865,156
	053 Health Infrastructures	7,730,312
	109 Active inclusion, including with a view to promoting equal opportunities and active participation, and improving employability	1,546,062
	116 Improving the quality and efficiency of, and access to, tertiary and equivalent education with a view to increasing participation and attainment levels, especially for disadvantaged groups	1,546,062
	113 Promoting social entrepreneurship and vocational integration in social enterprises and the social and solidarity economy in order to facilitate access to employment	773,031

Priority axis 2 - Environmental protection and risk management	085 Protection and enhancement of biodiversity, nature protection and green infrastructure	5,393,250
	087 Adaptation to climate change measures and prevention and management of climate related risks e.g. erosion, fires, flooding, storms and drought, including awareness raising, civil protection and disaster management systems and infrastructures	6,292,125
	088 Risk prevention and management of non-climate related risks	8,089,875
Priority axis 3 - Sustainable mobility and accessibility	021 Water management and drinking water conservation (including river basin management, water supply, specific climate change adaptation measures, district and consumer metering, charging systems and leak reduction)	2,696,625
	022 Waste water treatment	2,696,625
	041 Inland waterways and ports	7,191,000
	044 Intelligent transport systems (including the introduction of demand management, tolling systems, IT monitoring, control and information systems)	4,494,375
	046 ICT: High-speed broadband network	898,875
Priority axis 4 - Attractiveness for sustainable tourism	091 Development and promotion of the tourism potential of natural areas	3,200,000
	092 Protection, development and promotion of public tourism assets	4,800,000

	093 Development and promotion of public tourism services	3,200,000
	094 Protection, development and promotion of public cultural and heritage assets	4,800,000

Table 19: Dimension 2 Form of finance

2.3.8. A summary of the planned use of technical assistance including, where necessary, actions to reinforce the administrative capacity of authorities involved in the management and control of the programmes and beneficiaries and, where necessary, actions for to enhance the administrative capacity of relevant partners to participate in the implementation of programmes (where appropriate)

<i>Priority axis</i>	Sustainable Mobility and Accessibility
<p>Capacity building initiatives:</p> <ul style="list-style-type: none"> • For project generation, assisting potential beneficiaries for the identification of needs among target groups, coordination of administrative activities for establishment of partnerships • Procedures for the establishment of cross border partnerships; • For procurement procedures management; <p>Promotion initiatives:</p> <ul style="list-style-type: none"> • To activate participation among local administrations in remote areas, NGOs; • To inform the potential beneficiaries on the financing opportunities from the Programme; • To inform target groups on outputs of the programme; <p>Surveys and evaluation activities:</p> <ul style="list-style-type: none"> • Surveys among target groups to set baseline for the indicators and to monitor the impact of priority; • Programme evaluations. 	

2.4. Priority axis 4

2.4.1. Title and funding source

<i>ID of the priority axis</i>	4
<i>Title of the priority axis</i>	Attractiveness for sustainable tourism

<input type="checkbox"/> The entire priority axis will be implemented solely through financial instruments	
<input checked="" type="checkbox"/> The entire priority axis will be implemented solely through financial instruments set up at Union level	
<input type="checkbox"/> The entire priority axis will be implemented through community-led local development	

2.4.2. Fund, calculation basis for Union support and justification of the calculation basis choice

<i>Fund</i>	IPA
<i>Calculation basis (total eligible expenditure or public eligible expenditure)</i>	Total eligible expenditure
<i>Justification of the calculation basis choice</i>	In order to promote and equally finance the non-public eligible sector.

2.4.3. The specific objectives of the thematic priority and expected results

<i>ID</i>	4-1
<i>Specific objective</i>	<p>Developing the local tourism economy, based on the promotion of a sustainable cultural and recreational use of the natural and cultural heritage.</p> <p>Promoting growth of national and international demands for the tourism services and attractions in the eligible area, creating innovative cultural and leisure tourism attractions based on the common natural and cultural resources, improving attractiveness of networks and cross border tourism trails.</p>
<i>The results that the partner States seek to achieve with Union support</i>	<p>Increase of the national and international demand for cross border networks of tourism clusters, attracting various tourists categories, cultural business, naturalistic, especially from and international markets;</p> <p>Integration of local tourism attractions in the international networks of the Danube Basin.</p> <p>Establishment of a common brand and image for the local touristic offer attracting additional demand;</p> <p>Increase of the occupancy rate of tourist infrastructures, in all areas and for the diversified typologies of tourism;</p> <p>Establishment of touristic networks across the border, exploiting synergies and sharing innovative management and technological solutions.</p> <p>Create environment which stimulates public-private partnership initiatives and increases stakeholder's cross-border cooperation.</p>

<i>ID</i>	4-2
<i>Specific objective</i>	<p>Growth of the local tourism economy based on enhancement of quality of tourism services, based on a sustainable use of the natural and cultural heritage.</p> <p>Enhancing capacities and skills for the improvement of quality and quantity of tourism services and products in common networks and partnerships on the two sided of the border.</p>

	Improving the quality and sustainability of tourist infrastructure, and the accessibility of the aforementioned resources
<i>The results that the partner States seek to achieve with Union support</i>	<p>Enhancement of capacities among entrepreneurs and workers of the tourist sector, for the improvement of the quality of tourists services, and the diversification of tourist products;</p> <p>Improvement of the information and knowledge on local natural and cultural resources for the creation of innovative products and the establishment of conservation strategies.</p> <p>The improvement of the quality of tourist services offered in joint networks;</p> <p>The improvement of conservation and protection strategies, based on researches and studies carried out by partnerships of research institutions and specialized agencies.</p> <p>Preservation of natural and cultural heritage, through targeted investments in rehabilitation and restoration.</p>

2.4.4. Elements of other thematic priorities added to the priority axis

Not applicable

2.4.5. Actions to be supported under the thematic priority (by thematic priority)

2.4.5.1. *A description of the type and examples of actions to be supported and their expected contribution to the specific objectives, including, where appropriate, identification of the main target groups, specific territories targeted and types of beneficiaries*

<i>Thematic Priority</i>	Encouraging tourism and cultural and natural heritage.
<p>Indicative actions to be supported under thematic priority d), Priority Axis 4:</p> <p>Thematic Area 1: “Investments for the growth of the demand of local tourism networks and promotion of innovative tourism activities”</p> <ul style="list-style-type: none"> • Organization of knowledge transfer, exchange of good practice examples, networking and development of innovations for protection of natural and cultural heritage and sustainable tourism; 	

- Development of a cross-border regional image, brand and joint marketing initiatives,
- Development of distinct tourism products (e.g. monasteries, Roman heritage, wine routes, etc.) and integrated tourism services;
- Joint implementation of actions recording and promoting shared traditional features (music, language, folklore, etc.) including joint cultural events (festivals conferences, etc.) in relation to the aforementioned indicative actions.
- Investments in cross-border infrastructure for tourism services (tourist centres, welcome centres, info-points, service centres in the touristic sector)
- Investments in the touristic sector for the provision of innovative services, including infrastructure, for specific forms of tourism, like cultural tourism, thematic tourism, etc.
- Promotion of tourism infrastructure and touristic objectives;
- Development and rehabilitation of specific tourism routes, including installation of road signs and bilingual tourist information signs;
- Construction/ rehabilitation/ widening of access infrastructure to tourism attractions e.g. tourist roads within tourism areas, roads providing access to these areas, walking and cycle paths, facilities for adventure tourism;
- Investments in upgrading and rehabilitation of natural and cultural sites (e.g: religious monuments, traditional buildings and settlements, historical and archaeological sites, etc).
- Development, modernization of infrastructure of tourism attractions/ objectives;

Thematic Area 2: “Capacity building initiatives for the improvement of quality and innovation of tourism services and products”

- Establishment of partnership for research and studies on natural and cultural heritage in the area;
- Support of the creation of common brand and the improvement of quality standards of the services offered’
- Support for the development of cross-border tourist offers;
- Trainings for the improvement of tourism services;
- Strategies, exchange of experience in touristic sector;

Target groups of the Priority:

- Population living in the eligible area
- Unemployed, especially young and women
- Children and youth living in the eligible area

- Disadvantaged groups
- SME`s in the tourism sector Other institutions and entities related to tourism.
- Tourists and visitors.

Indicative types of beneficiaries

- Regional and local and public authorities (County Councils, Local Councils/ Municipalities, etc.) and other public bodies;
- Offices - branches of National/Regional Public Authorities active on the themes of the priority in the eligible area (registered and functioning in the eligible area);
- Health care institutions;
- Educational institutions;
- Non - profit bodies and NGOs;
- Religious organizations, legally established according to the national legislation in force;
- Chambers of Commerce;
- Museums, cultural, sports, touristic institutions, etc;

2.4.5.2. *Guiding principles for the selection of operations*

<i>Thematic priority</i>	Encouraging tourism and cultural and natural heritage.
<p>The selection of projects will be carried out following a standardized assessment procedure using the following sets of criteria:</p> <ul style="list-style-type: none"> • Strategic coherence: this criterion examines the coherence and contribution of each project proposal to the relevant Specific Objective addressed, the contribution to the envisaged results and the overall coherence of planned activities with the indicative types of actions. Further the cross-border added value of the operation, its territorial dimension and the relevance of the partnership will also be assessed in this context. • Coherence with state aid rules: any state aid that might be provided under this programme shall comply with the procedural and substantive State aid rules applicable at the time when the public support is granted. 	

- **Operative quality:** this criterion examines the design of the project proposal in relation to clarity and coherence of the operational objectives, activities and means, feasibility, efficiency, communication about the project and its results, potential for uptake and embedment into operative procedures of the partners involved.
- **Compliance with horizontal principles:** this criterion examines the consideration from the side of the project of the Programme horizontal principles and the demonstration of their integration and advancement within the project proposal intervention logic. The strategic coherence criterion basically examines the relevance of the project proposal, hence it retains primacy over the other two criteria.

Strategic projects (submitted): strategic projects will be selected through an open transparent procedure, based on specific selection criteria that will be defined according to the priority objectives.

The detailed assessment criteria will be laid down and made available to potential applicants in the calls for proposals documentation that will be approved by the programme bodies.

2.4.5.3. *Planned use of financial instruments (where appropriate)*

<i>Thematic priority</i>	Encouraging tourism and cultural and natural heritage.
<i>Planned use of financial instruments</i>	Not applicable
No financial instruments will be used	

2.4.6. Common and programme specific indicators

2.4.6.1. Priority axis result indicators (programme specific)

Table 13: Programme specific result indicators

ID	Indicator	Measurement unit	Baseline value	Baseline year	Target value (2023) ²⁰	Source of data	Frequency of reporting
PA4. RI1	Number of tourists arrivals in the eligible area. Flows of visitors in the area for all forms of tourism activities.	Units	600.000	2012	Increase	National statistical offices - Statistics on tourism	2017 2020 2023
PA4. RI2	Nights spent by tourists in the eligible area. Time spent by tourists in the area, for all types of touristic activities	Units	1.600.000	2012	Increase	National statistical offices - Statistics on tourism	2017 2020 2023
PA4 RI3	Perceived quality of touristic services and natural and cultural resources protection. Visitors perception of quality of touristic services and preservation and accessibility of natural and cultural resources	Qualitative indicator defined on an ordinal scale (1-10)	The result of the first survey will be established as base line	2015	Increase	Survey among visitors	2017 2020 2023

²⁰ Target values may be qualitative or quantitative.

PA4 RI4	New touristic products (new destinations) created	Units	0	2015	Increase	National statistical offices - Statistics on tourism	2017 2020 2023
------------	--	-------	---	------	----------	--	-------------------

2.4.6.2. *Priority axis output indicators (common or programme specific)*

Table 14: Common and programme specific output indicators

ID	Indicator (name of indicator)	Measurement unit	Target value (2023)	Source of data	Frequency of reporting
PA4.OI1	Cross border cooperation structures/ initiatives supported in the field of tourism	Units (No)	At least 20	Monitoring	Annual
PA4.OI2	Studies related to the implementation of selected projects or research and studies in the field of natural and cultural resources	Units (No)	At least 5	Monitoring	Annual
PA4.OI3	Number of participants attending training initiatives	Units (No)	At least 500	Monitoring	Annual

2.4.8. A summary of the planned use of technical assistance including, where necessary, actions to reinforce the administrative capacity of authorities involved in the management and control of the programmes and beneficiaries and, where necessary, actions for to enhance the administrative capacity of relevant partners to participate in the implementation of programmes (where appropriate)

<i>Priority axis</i>	Attractiveness for sustainable tourism
<p>Capacity building initiatives:</p> <ul style="list-style-type: none"> • For project generation, assisting potential beneficiaries for the identification of needs among target groups, coordination of administrative activities for establishment of partnerships • Procedures for the establishment of cross border partnerships; • For procurement procedures management; <p>Promotion initiatives:</p> <ul style="list-style-type: none"> • To activate participation among local administrations in remote areas, NGOs; • To inform the potential beneficiaries on the financing opportunities from the Programme; • To inform target groups on outputs of the programme; <p>Surveys and evaluation activities:</p> <ul style="list-style-type: none"> • Surveys among target groups to set baseline for the indicators and to monitor the impact of priority; • Programme evaluations. 	

SECTION 2.2 DESCRIPTION OF THE PRIORITY AXIS FOR TECHNICAL ASSISTANCE

2.5. Priority axis Technical Assistance

2.5.1. Title

<i>ID</i>	5
<i>Title</i>	Technical assistance

2.5.2. Fund and calculation basis for Union support

<i>Fund</i>	IPA
<i>Calculation Basis (total eligible expenditure or public eligible expenditure)</i>	Total eligible expenditure
<i>Justification of the calculation basis choice (only if total eligible expenditure basis selected)</i>	In order to promote and equally finance the non-public sector.

2.5.3. The specific objectives of the priority axis and the expected results

Specific objective (repeated for each specific objective)

<i>ID</i>	5-1
<i>Specific objective</i>	The aim of the priority is the promotion of an effective and efficient implementation of the Programme ensuring the effective functioning of the Programme bodies, and committees.

	<p>The efficient execution of all stages of the programme cycle and project implementation, starting from the project generation stage, control and audit activities, execution of programme monitoring and evaluation activities.</p> <p>The implementation of actions for the visibility of the programme strategy and results among target groups and stakeholders.</p>
<i>Results that the partner States seek to achieve with Union support</i> ²¹	Not applicable

2.5.4. Actions to be supported and their expected contribution to the programme implementation

<i>Priority axis</i>	Technical assistance
<p>The following actions will be supported:</p> <ul style="list-style-type: none"> • Establishment and operation of the Joint Technical Secretariat and JTS Antenna, • Design and implementation of a communication and visibility strategy; • Management of the Programme by the Managing Authority; • Establishment and operation of the Programme Monitoring Committee • Establishment of co-operation and co-ordination networks and contacts among Programme bodies and Partner States, as well as with bodies and representatives of other relevant EU-co-funded programmes by MA, NA, JTS, FLC and for promotion and information of the programme objectives; • Setting up appropriate procedures, materials and actions for the selection and implementation of projects, preparation of guidelines for applicants, project proposal generation and for project implementation; • Establishment of a IT system for monitoring, evaluation, financial management, verification and audit, including data on individual participants in projects; 	

²¹ Required where the Union support to technical assistance in the cooperation programme exceeds EUR 15 million.

- Creation of ICT tools for information and communication, web sites, emailing, etc.
- Design and implementation of an evaluation plan;
 - Execution of studies, analysis and surveys on the Programme activities and impact for the promotion and information;
- Setting-up of the bodies and procedures for first level control;
- Setting up and implementation of audit system with regard to the Programme management and control systems.

2.5.5. Programme specific indicators²²

Not applicable.

2.5.5.1. Programme specific result indicators

Table 28: Programme-specific result indicators

ID	Indicator	Measurement unit	Baseline value	Baseline year	Target value ²³ (2023)	Source of data	Frequency of reporting
PA5 RI 1	Effective absorption of funds Certified expenditures on planned allocation by the deadlines established	Ratio Percentage %	0	2015	80%	Monitoring system	2017 2020 2023

²² Required where objectively justified by the given the content of the actions and where the Union support to technical assistance in the cooperation programme exceeds EUR 15 million.

²³ The target values can be qualitative or quantitative.

2.5.5.2. Programme specific output indicators expected to contribute to results

Table 29: Programme specific output indicators

ID	Indicator	Measurement unit	Target value (2023) (optional)	Source of data
PA5.OI1	Number of meetings of programme bodies	Units (No)	2 per year	Monitoring
PA5.OI2	Number of projects calls implemented	Units (No)	2	Monitoring
PA5.OI5	Number of interim programme evaluations implemented	Units (No)	2	Monitoring
PA5.OI6	Number of events for information and promotion	Units (No)	2 per year	Monitoring

2.5.6. Categories of intervention

Corresponding categories of intervention based on a nomenclature adopted by the Commission, and an indicative breakdown of Union support.

Tables 30-32: Categories of intervention

5 Technical assistance	N.A.	<p>The aim of the priority is the promotion of an effective and efficient implementation of the Programme ensuring the effective functioning of the Programme bodies, and committees</p> <p>The efficient execution of all stages of the programme cycle and project implementation, starting from the project generation stage, the control and audit activities, the execution of programme monitoring and evaluation activities.</p> <p>The implementation of actions for the visibility of the programme strategy and results among target groups and stakeholders.</p>	<p>PA5RI1- Effective absorption of funds</p> <p>Certified expenditures on planned allocation by the deadlines established</p>	<p>PA5.OI1 Number of meetings of programme bodies</p> <p>PA5.OI2 Number of projects calls implemented</p> <p>PA5.OI3 Number of interim programme evaluations implemented</p> <p>PA5OI4 Number of events for information and promotion</p> <p>PA5OI5 Number of events for information and promotion</p>

Strategic projects

Strategic projects might be identified through dedicated selection procedures, ensuring equal access and transparent competition, for the achievement of the programme objectives, the priorities' specific objectives and the compliance to the horizontal principles.

Strategic projects should ensure a substantial contribution to a real and strong cross-border impact of the programme and to the achievement of sustainable and long-term results. Strategic Projects outcome must produce an effective and focused answer to the eligible territory needs as envisaged by the Programme strategy, and result in a significant and long-lasting change or improvement on the whole or large parts of the programme area.

The Strategic Projects can be designed and implemented in the framework of the four priority axes of the programme.

The share of IPA resources dedicated to the strategic projects is within 30% of the IPA funds allocated to the programme

The basic principles for the eligibility of a strategic project may be the following:

- To address key specific objectives that can be achieved only through the involvement of large partnerships and /or of key stakeholders on the two sides of the border.
- To be based on a larger financial size than ordinary projects, proportionate to the relevance of the objectives and results.
- To produce lasting effects and catalyse further actions by public and private stakeholders and/or public financing and human resources;
- To promote permanent cooperation opportunities in the fields of social and cultural inclusion.

The fields of intervention in which strategic projects could be developed are those addressed by the thematic priorities selected for the programme's intervention.

Strategic projects could be especially relevant for the coordination of the programme strategy with that of the EU Strategy for Danube Region.

3. SECTION 3 FINANCING PLAN

3.1. Financial appropriation from the IPA (in EUR)

3.1.1. Total financial appropriation from the IPA per year

Table 34

Fund	2014	2015	2016	2017	2018	2019	2020	Total
IPA	3,715,407	5,424,998	7,747,241	14,076,691	14,358,225	14,645,389	14,938,297	74,906,248

3.1.2. Total financial appropriation from the IPA and national co-financing (in EUR)

- 1. The financial table sets out the financial plan of the cooperation programme by priority axis.*
- 2. The financial table shall show for information purposes, any contribution from third countries participating in the cooperation programme (other than contributions from IPA and ENI)*
- 3. The EIB²⁴ contribution is presented at the level of the priority axis.*

²⁴ European Investment Bank

Table 35: Financing plan

Priority axis	Basis for calculation of Union support (Total eligible cost or public eligible cost)	Union support (a)	National counterpart (b) = (c) + (d)	Indicative breakdown of the national counterpart		Total funding (e) = (a) + (b)	Co-financing rate (f) = (a)/(e) (2)	For information	
				National Public funding (c)	National private funding (d) (1)			Contributions from third countries	EIB contributions
Priority axis 1 - Employment promotion and services for an inclusive growth	18,188,968	15,460,624	2,728,344	2,460,058	268,286	18,188,968	85.00%		
Priority axis 2 - Environmental protection and risk management	21,150,000	17,977,500	3,172,500	2,860,538	311,962	21,150,000	85.00%		
Priority axis 3 - Sustainable mobility and accessibility	21,150,000	17,977,500	3,172,500	2,860,538	311,962	21,150,000	85.00%		
Priority axis 4 - Attractiveness for sustainable tourism	18,823,529	16,000,000	2,823,529	2,545,882	277,647	18,823,529	85.00%		
Priority axis 5 - Technical Assistance	8,812,499	7,490,624	1,321,875	1,321,875	0	8,812,499	85.00%		
Total	88.124.996	74.906.248	13.218.748	10.925.297	2.293.451	88.124.996	85.00%		

(1) To be completed only when priority axes are expressed in total costs.

(2) This rate may be rounded to the nearest whole number in the table. The precise rate used to reimburse payments is the ratio (f).

3.1.3. Breakdown by priority axis and thematic priority

Table 36

Priority axis	Thematic priority	Union support	National counterpart	Total funding
Priority axis 1 Employment promotion and services for an inclusive growth	TP a): promoting employment, labour mobility and social and cultural inclusion across borders	15,460,624	2,728,344	18,188,968
<i>Priority axis 2 Environmental protection and risk management</i>	TP b): protecting the environment and promoting climate change adaptation and mitigation, risk prevention and management	17,977,500	3,172,500	21,150,000
<i>Priority axis 3 Sustainable mobility and accessibility</i>	TP c): promoting sustainable transport and improving public infrastructures	17,977,500	3,172,500	21,150,000
<i>Priority axis 4 Attractiveness for sustainable tourism</i>	TP d): encouraging tourism and cultural and natural heritage	16,000,000	2,823,529	18,823,529
<i>Priority axis 5 Technical assistance</i>		7,490,624	1,321,875	8,812,499
Total		74,906,248	13,218,748	88,124,996

4. SECTION 4 - INTEGRATED APPROACH TO TERRITORIAL DEVELOPEMENT

Description of the integrated approach to territorial development, taking into account the content and objectives of the cooperation programme and showing how it contributes to the accomplishment of the programme objectives and expected results

Not applicable

4.1. Community-led local development (where appropriate)

Approach to the use of community-led local development instruments and principles for identifying the areas where they will be implemented

Not applicable

4.2. Integrated Territorial Investment (ITI) (where appropriate)

Approach to the use of Integrated Territorial Investments (ITI) (as defined in Article 36 of Regulation (EU) No 1303/2013) other than in cases covered by 4.2, and their indicative financial allocation from each priority axis

Not applicable

Table 37: Indicative financial allocation to ITI (aggregate amount)

Priority axis	Indicative financial allocation (Union support) (EUR)
	Not applicable

4.3. Contribution of planned interventions towards macro-regional and sea basin strategies, subject to the needs of the programme area as identified by the relevant partner States and taking into account, where applicable, strategically important projects identified in those strategies (where appropriate)

(Where partner States and regions participate in macro-regional and/or sea basin strategies)

The EU Strategy for the Danube Region provides an overall framework for the Danube area aiming both to foster integration and integrative development. The Danube Region covers 14 countries (Germany, Austria, Hungary, Czech Republic, Slovak Republic, Slovenia, Bulgaria, Romania, Croatia, Serbia, Bosnia and Herzegovina, Montenegro, Republic of Moldova, Ukraine).

The Danube Region Strategy addresses a wide range of issues; these are divided among 4 pillars and 11 priority areas (see Graphic below).

Figure 1. EU Strategy for the Danube Region Structure

Source: <http://www.danube-region.eu>

The Programme demonstrates a high relevance and coherence with EUSDR initiatives. The table below gives an overview over the Programme Priority Axes and thematic areas.

The Priority Axes objective is closely correlated to the **EU Danube Region Strategy**, especially, but not exclusively, to Pillar 3: Building Prosperity in the Danube Region.

The Priority Axes of the Programme:

1- Employment promotion and basic services strengthening for an inclusive growth (thematic objective a)

Danube strategy Priority Areas specially relevant:

- PA 9 To invest in people and skills
- PA 7 To develop the knowledge society through research, education and IT

2- Environmental protection and risk management (thematic objective b)

The Priority Axis objective is closely correlated to the **EU Danube Region Strategy**, especially to the following Priority Areas (PA):

- PA 4 “ To restore and maintain the quality of waters”,
- PA5 “To manage environmental risks” and
- PA6 “To preserve biodiversity, landscapes and the quality of air and soils”.

The CBC dimension is extremely relevant, for the integrated and interdependent environmental systems, in the Carpathian Chain, and the Danube Basin, the Banat plains and also for the common challenges generated by industrial pollution, decommissioning of obsolete industrial activities, brown fields.

3- Sustainable mobility and accessibility (thematic objective c)

The Priority Axis objective is closely correlated to the **EU Danube Region Strategy**, especially to the following Priority Areas (PA):

- PA 1 To improve mobility and multimodality
- PA7 “To develop the knowledge society through research, education and IT

The CBC dimension is present in the sense that the aforementioned weaknesses affect the attractiveness of the entire programme area, while negatively contributing to the intraregional disparities between favoured and less favoured areas.

Due to the financial capacity of the Programme, the coordination of the projects implemented in the eligible area with those implemented the Danube Region is particularly relevant.

4- Attractiveness for sustainable tourism (thematic objective d)

The priority is coordinated to the Danube region strategy, that identifies actions for the sustainable development based on the natural and cultural resources among the main pillars of the regional strategy:

Pillar 1: connecting the Danube Region.

PA 3 To promote culture and tourism, people to people contacts.

The results to be achieved by the programme are the creation of a recognizable identity for the entire area as a destination for sustainable tourism, the promotion of innovative type of tourism, the integration of the area in the touristic networks targeting the diverse environmental systems, of the Danube Basin, the Carpathian Areas, the rural areas of Banat. The increase of the capacity for joint protective actions of the natural resources.

5. SECTION 5 - IMPLEMENTING PROVISIONS FOR THE COOPERATION PROGRAMME

5.1. Relevant authorities and bodies

5.3. Procedure for setting up the joint secretariat

Procedure for setting up the joint secretariat

The Joint Technical Secretariat shall be located in Timișoara and hosted by Romanian Regional Office for Cross Border Cooperation Timișoara for the 2014-2020 programming period as it was the case during the 2007-2013 Romania-Serbia IPA Cross Border Cooperation Programme, based on the following arguments:

- the experience from 2007-2013 programming period will allow a swift start of the implementation of the new Programme (launch of calls for proposals soon after the Programme's approval in order to ensure a high level of absorption);
- the Joint Technical Secretariat within the Regional Office for Cross Border Cooperation Timișoara is an already existing institution with international staff (Romanian and Serbian) with experience in programme management/ implementation;
- the management structures and the working procedures of the JTS have been audited during 2007-2013 programming period and only minor changes

are needed in order to reflect the provisions of the new EU regulations and the lessons learned;

The Programme bodies also decided to finance the Antenna of the Joint Technical Secretariat in Vršac on the Serbian side for the 2014-2020 programming period. The Antenna of the JTS functioned also during the 2007-2013 programming period and will have as a main role to disseminate information at regional level, and to support projects development in Republic of Serbia.

The JTS (JTS and JTS Antenna) and FLC staff for the 2007-2013 Romania-Serbia IPA Cross Border Cooperation Programme are already trained and experienced. Establishment of JTS (main office and antenna) will be based on already gained experience from the IPA CBC programme 2007-2013. In that way taking over of the additional responsibilities for the implementation of 2014-2020 Programme will be complete in efficient and timely manner. Bodies responsible for first level control function are already assigned in the document.

The number and qualification of JTS and JTS Antenna staff shall correspond to the tasks and shall be done through a public and transparent procedure, ensuring equal opportunities and promoting equality between men and women. Staff of the JTS shall be proficient in English and in at least one of the relevant languages Romanian or Serbian.

Both the Managing Authority and the National Authority may observe the selection process for the Joint Tehnical Secretariat and Antenna staff..

5.4. Summary description of the management and control arrangements

The Programme institutional structure consists of the following bodies: the Managing Authority (MA) acting also as Certifying Authority (CA), the National Authority (NA), the Joint Monitoring Committee (JMC), the Audit Authority (AA), the Joint Technical Secretariat (JTS) and the first level control systems in Romania and Serbia.

The MA, Serbia NA, AA, Audit Authority Office of EU Funds from Republic of Serbia, the JTS, the JTS Antenna, the First Level Control Unit within RO CBC Timișoara **and part of the costs of the First Level Control Unit in the Ministry of Finance of the Republic of Serbia (up to 6 FLC officers and necessary administrative and travel costs) will be** financed from the Technical Assistance budget.

The Managing Authority (with additional functions of Certifying Authority)

Romania and Serbia have agreed to entrust the functions of Managing Authority and Certifying Authority for the Programme to the Romanian Ministry of Regional Development and Public Administration. The same institution performed the MA functions in 2007-2013 programming period.

The Managing Authority is responsible for managing and implementing the Programme in accordance with the principles of sound financial management and the provisions of article 37, para. 1 of Regulation (EU) No 447/ 2014, as well as for certifying the expenditure to EU according to the provisions of art. 37, para. 2 of Regulation (EU) No 447/ 2014.

Beside the tasks and responsibilities provided for in the Regulations, the managing authority shall also be responsible for:

- a) Signing the subsidy contracts financed from IPA with the lead beneficiaries;
- b) Signing the contracts regarding the national co-financing from the state budget with the Romanian beneficiaries;
- c) Ensuring the transfer of the IPA amounts to the lead beneficiaries;
- d) Ensuring the transfer of the national co-financing from the state budget to the Romanian project beneficiaries;
- e) Ensuring the transfer of the IPA funds and national co-financing to the beneficiaries of the Technical Assistance priority axis;
- f) Ensuring the availability of the amounts from the national co-financing for the budget of the Technical Assistance priority axis;
- g) Ensuring access to information for the National Authority and Audit Authority in order to fulfil their respective tasks;
- h) Ensuring the compliance of the expenditures with the Programme rules, Community rules, and with the Programme's procedures through an adequate control system;
- i) Ensuring the compliance with the Romanian national legislation or specific legislation and procedures regarding public procurement;
- j) Designating the controllers responsible for carrying out the first level control for the partners located in Romania;
- k) Nominating the representatives of Romania in the Joint Monitoring Committee;

- l) Ensuring an adequate audit trail for the whole system concerning the implementation of the Programme;
- m) Preventing, detecting, and correcting the irregularities committed in Romania;
- n) Coordinating the activities regarding the implementation of the Programme delegated to the JTS;
- o) Ensuring the fast record and update of the information into the electronic system, being responsible for the accuracy, integrity, and completeness of the data concerning the Programme managed;

The Managing Authority will also carry the functions of the Certifying Authority. This modification is based on the experiences of the Romania-Serbia IPA Cross-Border Cooperation Programme during 2007-2013 and will simplify and reduce the duration of the payment process. The European Commission will reimburse the certified expenditure directly in a special bank account of the Ministry of Regional Development and Public Administration.

As regards the certification of expenditure, the managing authority shall be responsible for:

- a) drawing up and submitting payment applications to the Commission, and certifying that they result from reliable accounting systems, are based on verifiable supporting documents, and have been subject to verifications by the managing authority;
- b) drawing up the annual accounts referred to in point (a) of Article 59(5) of the Financial Regulation;
- c) certifying the completeness, accuracy, and veracity of the annual accounts and that the expenditure entered in the accounts complies with applicable law and has been incurred in respect of operations selected for funding in accordance with the criteria applicable to the operational programme and complying with applicable law;
- d) ensuring that there is a system which records and stores, in computerised form, accounting records for each operation, and which supports all the data required for drawing up payment applications and accounts, including records of amounts recoverable, amounts recovered, and amounts withdrawn following cancellation of all or part of the contribution for an operation or operational programme;
- e) ensuring for the purposes of drawing up and submission of payment applications, that it has received adequate information from the

controllers on the procedures and verifications carried out in relation to expenditure;

f) taking account when drawing up and submitting payment applications of the results of all audits carried out by, or under the responsibility of, the audit authority;

g) maintaining, in a computerised form, accounting records of expenditure declared to the Commission and of the corresponding public contribution paid to beneficiaries;

h) keeping an account of amounts recoverable and of amounts withdrawn following cancellation of all or part of the contribution for an operation. Amounts recovered shall be repaid to the budget of the Union prior to the closure of the operational programme by deducting them from the subsequent statement of expenditure.

National Authority in Republic of Serbia (NA)

The Serbian NA, represented by the Serbian European Integration Office within the Government of Republic of Serbia, carries out mainly functions as follows:

1. Supporting the MA in the management and implementation of the Programme;
2. Ensuring the availability of the amounts from the national co-financing for the budget of the TA Priority Axis;
3. Ensuring access to information and relevant documents for the MA and AA in order to fulfil their respective tasks;
4. Informing the MA on the control system in the Republic of Serbia as well as on designated controllers responsible for carrying out the first level control for the partners located in the Republic of Serbia;
5. Nominating the representatives of the Republic of Serbia in the Joint Monitoring Committee;
6. Participating in the setting up of the procedures to ensure the proper functioning of the management and control systems including ensuring an adequate audit trail for the system concerning the implementation of the Programme in the Republic of Serbia;
7. Ensuring the compliance of the expenditures with the national Serbian and Community legislation and also with the Programme level procedures, by ensuring an adequate control system. EU legislation prevails where national legislation is not harmonized with the EU legislation;
8. Preventing, detecting and correcting the irregularities identified on the territory of the Republic of Serbia;

9. Reporting to the MA about any detected irregularity which happened on the territory of the Republic of Serbia and about the activities undertaken in order to resolve it;

10. Recovery of amounts unduly paid from the Serbian project partners, (in the event that such amounts cannot be recovered from the project partners concerned) and it shall do so in close cooperation with the MA;

The Joint Monitoring Committee

In accordance with Article 38 of Regulation (EU) No. 447/2014, the participating countries will set up a Joint Monitoring Committee (JMC) within 3 months of the notification to the Member State of the decision approving the cross-border cooperation programme.

Overall monitoring of the Programme implementation lies within the competencies of the Joint Monitoring Committee (JMC). The composition of the JMC includes the representatives of the Member State - Romania as well as representatives from the partner country- Republic of Serbia, who will have an equal role in the JMC.

Besides the responsibilities set forward in art. 38 of the Regulation (EU) No. 447/2014 the Joint Monitoring Committee shall ensure the quality of the implementation of the Programme.

Composition and procedures of the Joint Monitoring Committee

The composition of the Joint Monitoring Committee is decided by the participating countries to the Programme and in accordance with Article 38 of the Regulation (EU) No. 447/2014. The Joint Monitoring Committee shall have a balanced representation and a limited number of representatives from the national, regional and local level and other economic, social and environmental partners of both states participating in the programme to ensure efficiency and broad representation.

A representative of the MA, who conducts the meeting in an arbitrary role, not having a voting right, shall chair the Joint Monitoring Committee. Representatives of the partner country may take co-chairmanship. Representatives of the Joint Technical Secretariat shall assist the work of the Joint Monitoring Committee.

At its first meeting, the Joint Monitoring Committee shall draw up its rules of procedure and adopt them in order to exercise its mission in accordance to the Regulation (EU) No. 447/2014. Decisions taken by the Joint Monitoring Committee shall be made by consensus among the national delegations of both participating countries (one vote per country). Decisions of the Committee may be taken via written procedure.

Details regarding the practical organisation of the JMC meetings will be provided in the Committee's rules of procedure.

Convening a meeting

Meetings of the Joint Monitoring Committee shall be held at least once a year. Additional meetings may be convened by the Chairperson either at the request of one of the participating countries to the Programme or of the Commission.

Role and tasks of the audit authority and group of auditors

According to the Article 127 (4) of Regulation (EU) No. 1303/2013, a single audit authority shall be appointed by the Member States. The designated audit authority of the Programme is the Audit Authority (AA) within the Romanian Court of Accounts, located in Bucharest, 20 Ernest Broșteanu Street, Sector 1, Romania.

The provisions of the Article 25 of the Regulation (EU) No 1299/2013 (referring to the Article 127 of the Regulation (EU) No 1303/2013), concerning the group of auditors shall be applied.

The main competencies and responsibilities of the AA, as provided for in the Regulation (EU) No 1303/2013, article 127 are:

- to ensure that audits are carried out on the management and control systems, on an appropriate sample of operations and on the annual accounts;
- to prepare an audit strategy, within eight months of adoption of the Programme, which shall set out the audit methodology, the sampling method for audits on operations and the planning of audits in relation to the current accounting year and the two subsequent accounting years. The audit strategy shall be updated annually from 2016 until and including 2024.

The AA shall:

- ensure that through a system audit before the submission of the first accounts that the CA has the accurate procedures in place to account for the amounts to be withdrawn or to be recovered and to be deducted from payment claims during the accounting year as well as to follow-up pending recoveries and irrecoverable amounts;
- draw up an annual audit opinion in accordance with the second subparagraph of Article 59(5) of the Financial Regulation;
- draw up an annual control report setting out the main findings of the audits carried out in accordance with Article 127(1) of Regulation (EU)

No 1303/2013, including findings with regard to deficiencies found in the management and control systems, and the proposed and implemented corrective actions.

In carrying out its functions, in compliance with Article 25 of Regulation (EU) No 1299/2013, the AA is assisted by a GoA composed of a representative from each of the participating countries. Each participating country shall be responsible for audits carried out on its territory. Each representative from each participating country in the Programme shall be responsible for providing the factual elements relating to expenditure on its territory that are required by the audit authority in order to perform its assessment.

The GoA will be set up within three months of approval of Programme. It will draw up its own rules of procedure, under the lead of the chair, the AA. The rules of procedure will include a detailed description of the functions and responsibilities of each of the audit actors.

These auditors shall be functionally independent from FLC/JTS/NA/MA.

The GoA will assist the AA in setting up and implementing the audit strategy. The audit strategy will also indicate which measures have been put in place by the AA and the GoA, in order to ensure that the same audit methodology, in accordance with internationally accepted audit standards, has been applied by all members of the Group of Auditors.

The quality and completeness of the audit work carried out and/or the documents issued will be ensured by the AA together with the GoA. Periodic quality reviews of working methods and procedures shall be carried out by the AA together with the GoA to ensure that the audit reports and findings can be fully relied upon. Such reviews shall cover the audit files, working and supporting papers and monitoring and follow-up systems.

5.5. Apportionment of liabilities among partner States in case of financial corrections imposed by the managing authority or the Commission

Each participating country shall be responsible for investigating irregularities committed by the beneficiaries located on its territory. In the case of a systematic irregularity, the participating country shall extend its investigation to cover all operations potentially affected. The participating country shall make the financial corrections in connection with individual or systemic irregularities detected in operations or Programme. Financial correction shall consist of cancelling all or part of the public contribution to an operation or to the programme. Financial corrections shall be recorded in the annual

accounts by the managing authority for the accounting year in which the cancellation is decided.

The Managing Authority shall ensure that any amount paid as a result of an irregularity is recovered from the lead beneficiary. Beneficiaries shall repay the lead beneficiary any amounts unduly paid. Special provisions regarding the repayment of amounts subject to an irregularity shall be included both in the contract to be signed with the lead beneficiary and in the partnership agreement to be signed between the beneficiaries. The Programme shall provide the beneficiaries a template of the Partnership Agreement.

If the lead beneficiary does not succeed in securing repayment from other beneficiaries or if the managing authority does not succeed in securing repayment from the lead beneficiary, the participating country on whose territory the beneficiary concerned is located shall reimburse the managing authority the amount unduly paid to that beneficiary. The Managing Authority shall be responsible for reimbursing the amounts concerned to the general budget of the Union, in accordance with the apportionment of liabilities among the participating countries.

In accordance with article 85 of Regulation no.1303/2013 (CPR) the Commission has the right of making financial corrections by cancelling all or part of the Union contribution to the programme and effecting recovery from the participating countries in order to exclude from Union financing expenditure which is in breach of applicable Union and national law, including in relation to deficiencies in the management and control systems which have been detected by the Commission or the European Court of Auditors.

In case of any financial corrections by the Commission, the two participating countries commit to dividing the amount between the two participating countries proportionally with the approved project budgets and performed activities by Romanian and Serbian beneficiaries, affected by the financial correction. In case of financial corrections by the Commission, due to irregularities, the two participating countries commit to investigate the respective irregularities on a case by case basis. The financial correction by the Commission shall not prejudice the participating countries' obligation to pursue recoveries under the provisions of the applicable EU Regulations.

5.6. Use of the Euro (where applicable)

Method chosen for the conversion of expenditure incurred in another currency than the Euro

In accordance with the ETC Regulation, Article 28, expenditure incurred by project partners located in countries, which are outside of the Euro zone, shall be converted into euro. The conversion is to be made by the beneficiaries using the monthly accounting **exchange rate of the Commission applied in**

the month during which that expenditure was submitted for verification to the controller.

5.7. Involvement of partners

Actions taken to involve the partners referred to in Article 5 of Regulation (EU) No 1303/2013 in the preparation of the cooperation programme, and the role of those partners in the preparation and implementation of the cooperation programme, including their involvement in the Joint Monitoring Committee

Participation of partners in the preparation of the programme

The programme partners, including representatives of programme target groups, stakeholders, potential beneficiaries, were deeply involved in the programme preparation, with various tools of information and promotion and with meetings and conferences held since the first stages of the programming process.

The consultations for the Territorial analysis and SWOT

The stakeholders and potential beneficiaries were asked to contribute to the elaboration of the Territorial analysis and SWOT by participating in two workshops, one held in Romania at Drobeta Turnu Severin and one held in Serbia at Pancevo, that offered the opportunity to all participants to intervene actively and to bring their experiences and feedback.

In parallel, programme partners were asked to contribute with their vision through surveys based on questionnaires. The partners expressed their views and opinions by answering the open questions in the questionnaire provided, and offering a quantitative ranking for their agreement to the sections of the first draft of the SWOT, based on a scale of 5 levels from total disagreement (1) to perfect agreement (5).

The participation to all three parallel stages of consultation was large, and active, from all counties and districts of the eligible area. A little more of the 50% of the participants to the survey are partners of projects financed by the current programme, and among them were included representatives of NGO, educational and university institutions, local administrations.

The qualitative feedback, proposals of new items for the SWOT, critics to others, were considered for the revision of the SWOT, and are incorporated in the new draft proposed to the partners.

The quantitative evaluation, based on “agreement marks” from 5, maximum, to 1 minimum, produced very positive results.

The average of these quantitative appraisals is very high for all sections of the SWOT, as shown in the table below. The rankings made by Serbian and Romanian partners were very similar, proving that the analysis was equally accurate on both sides of the border and both target groups perceived that their specific needs and challenges well represented in the common framework.

SWOT SECTION	Average evaluation mark of SWOT items (5 perfect agreement 1 total disagreement)		
	Serbian stakeholders	Romanian Stakeholders	All interviews Average
Social and demographic structure	4,44	4,43	4,44
Economy, SMEs development, Labor Market	3,89	4,39	4,25
Transport infrastructures, Accessibility, CBC connection	4,50	4,43	4,45
Environment Natural and cultural resources, Tourism	4,33	4,50	4,45
Education, R&D and Innovation	4,33	4,35	4,34
Local institutions and civil society	4,44	4,67	4,60

The consultations for the definition of the programme strategy, priorities and specific objectives and actions.

A second round of consultations was held after the approval of the selection of the priority axes themes.

The aim of this second round was that of the collection of feedback from stakeholders on the expected results per each investment priority, the potential actions and project examples.

The consultations used multiple instruments and methodologies: workshops, collection of project ideas from the potential beneficiaries, publication of the programme draft on the programme web site, with invitation to the submission of comments and proposals.

The workshops with the stakeholders were held on both sides of the borders, as follows:

20-21 February 2014: In Drobeta Turnu-Severin, Romania and Pancevo, Serbia the draft Territorial Analysis and SWOT analysis were discussed with the stakeholders. Also the potential beneficiaries were invited to present their proposals for the improvement of the programme implementation system.

18-19 June 2014: In Reșița, Romania and Smederevo, Serbia, the first programme draft was discussed together with the strategic projects proposals. Once more the potential beneficiaries were invited to present their proposals for the improvement of the programme implementation system

The total number of participants in these workshops was higher than 60, with representatives from all target groups and stakeholders.

The consultations via internet produced a rich set of comments and proposals for the improvement of programming documents (Territorial Analysis, SWOT Analysis, Draft Programme). Moreover, the potential beneficiaries were invited to fill in questionnaires with their project ideas that were used by the MA and the programming team to revise and improve the priority axes/ thematic areas content.

In addition to the workshops, consultations and debates on the programming documents were held during the Joint Working Groups for Planning and Programming as follows:

On 16th of May 2013, the first meeting of the Joint Working Group for Planning and Programming for Romania-Serbia IPA CBC Programme 2014-2020 was held. During this meeting the JWG approved its Rules of Procedure, the Terms of Reference for Planning and Programming and the Terms of Reference for Ex-Ante Evaluation and Strategic Environmental Assessment.

On 10th of December 2013, in Bor, Serbia the first discussion on the draft Territorial Analysis and SWOT analysis was held.

On 03rd of March 2014, in Reșița, Romania, the final versions of Territorial Analysis and SWOT analysis were discussed and the JWG members were invited to submit any other additional comments until 14th of March. The documents

included the comments and proposals received from the stakeholders during the workshops. Also the first draft of programme strategy was discussed.

On 31st of March 2014, in Vrsac, Serbia, the Territorial Analysis and SWOT analysis were approved, including the thematic priorities to be financed through the Programme.

On 29th of May 2014, in Baile Herculane, the priority axes were approved and also the JWG took the decision that strategic projects will be financed within the limit of 30% from the total IPA funds allocated to the programme.

On 8th of July 2014, in Veliko Gradiste, Serbia, the Joint Working Group approved the thematic areas and indicative actions.

6. SECTION 6 - HORIZONTAL PRINCIPLES

6.1. Sustainable development

Programme Authorities must *ensure that environmental protection requirements, resource efficiency, climate change mitigation and adaptation, biodiversity and ecosystem protection, disaster resilience and risk prevention and management are promoted in the preparation and implementation of the programmes.*

In the case of the Romania-Serbia IPA CBC Programme the biggest challenges are related to environmental and biodiversity protection and sustainable use of natural resources and the addressing of climate change, environmental risks management and emergency preparedness. These challenges relate to the protection of the environment as an intrinsic value of the region and as a prerequisite for sustainable tourism.

The Programme is implemented via a number of projects. The assessment of the quality of the eligible project proposals should be based on a set of quality criteria which are common to all Priority Axes and Investment Priorities. When examining project proposals the guiding question is:

“Is the operation contributing to the promotion of sustainable development?”

The contribution of each project to these principles will be addressed in a qualitative manner in the frame of project selection and programme monitoring and evaluation.

As a technical tool for the evaluators the following aspects will be considered in project selection:

- Contribution to energy efficiency, renewable energy use and reduction of greenhouse gas (GHG) emissions²⁵
- Contribution to efficient water supply, waste-water treatment and water reuse;
- Application of green public procurement in a systematic manner;
- Contribution to efficient waste management, re-use and recycling;
- Contribution to the development and management of green infrastructures including sound management of Natura 2000 sites on the Romanian side and equivalent natural protected areas on the Serbian side;
- Contribution to sustainable mobility and intermodality;
- Contribution to sustainable integrated urban development;
- Contribution to enhanced awareness of adaptation to climate change and risk prevention;
- Contribution to more employment opportunities, education, training and support services in the context of environment protection, risk management and sustainable development etc.

The estimated decrease of greenhouse gas emissions, the increase in energy efficiency and in renewable energy production are EU 2020 headline target indicators and should be monitored across supported operations.

6.2. Equal opportunities and non-discrimination

The European Commission underlines that “Member States and the Commission shall take appropriate steps to prevent any discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or

²⁵ The estimated decrease of greenhouse gas emissions, the increase in energy efficiency and in renewable energy production are EU 2020 headline target indicators and should be monitored across supported operations.

sexual orientation during the preparation and implementation of programmes”²⁶.

Non-discrimination covers not only women (and men) but any discrimination based on racial or ethnic origin, religion or belief, disability, age or sexual orientation. While anti-discrimination legislation is an acquired aspect of EU legal systems, the practical implementation of anti-discrimination practices is lagging behind. Equal access to information and controls on whether equality and non-discrimination requirements are being met is also an issue.

In the course of programme preparation, the Programme has observed non-discrimination and addressed relevant issues related to the socio-demographic developments in the eligible area (mainly related to ethnic composition, access to services and opportunities, migration and ageing) in the SWOT analysis. The strategy of the Programme puts emphasis in the availability of programme benefits to everyone through knowledge diffusion and dissemination, equality in the quality and access to social and public services, promotion of resources efficiency and availability of public environmental goods and services.

During programme implementation, the Programme emphasizes on the principle of equal access to information of the possibilities offered by the Programme. This includes targeting different social groups adequately; removing barriers in the communication of the Programme (e.g. media, language etc.), promoting barrier free approaches etc.

In the fields of monitoring and evaluation, attention will be given to equal opportunities and non-discrimination through:

- the inclusion of relevant indicators related to the profile of persons involved in the projects, e.g. on gender, ethnic origin, age, occupation and education level, disabilities etc.,
- the inclusion of relevant stakeholders in the Joint Monitoring Committee and
- the evaluation of actions for the involvement of potentially discriminated groups in Programme Implementation e.g. related to flexible working arrangements, deputy arrangements, provisions for persons with disabilities, etc.)

While no penalty is foreseen for the projects, e.g. when not actively promoting non-discrimination and equal opportunities, it will be analysed

²⁶

Article 7,CPR, COM(2011) 615 final/2, Brussels, 14.3.2012, p. 34

based on the monitoring findings what was achieved in the field and which where the obstacles in the cases this did not materialise.

This strategic orientation of the Programme can be enhanced by a targeted selection of operations. When examining proposals the following “guiding question - where appropriate - should be assessed:

Is the operation contributing to the promotion of equal opportunities and non-discrimination?

The assessment of the quality of the eligible project proposals will be based on a set of quality criteria which are common to all Priority Axes and Thematic Areas. As a guide for the evaluators the following indicative aspects could be considered in project selection:

- Consideration of the different needs and intended and unintended impact of the project on different groups (e.g. people with disabilities, minorities and migrants, people of different religious beliefs and people of different sexual orientation etc.);
- Consideration of equal opportunities and non-discrimination in project implementation, e.g. concerning the establishment of an Equal Opportunities Action Plan, definition of equal opportunity targets, provision of equal opportunities training or diversity management courses, provision of supporting services;
- Provisions for an equal access to the operation’s outputs and benefits for all members of the society.

6.3. Equality between men and women

The aim of equality between women and men belongs to the fundamental values of the European Union and is set out in the Treaty on the European Union. Article 3 states that the Union shall “*combat social exclusion and discrimination, and shall promote social justice and protection, equality between women and men, solidarity between generations and protection of the rights of the child*”²⁷. The elimination of inequalities and the promotion of equality between women and men are also included in the consolidated version of the Treaty on the Functioning of the European Union²⁸. These fundamental values must be respected in the regulations and implementation of the Programme as indicated by the

²⁷ Consolidated version of the Treaty on European Union - TITLE I: COMMON PROVISIONS - Article 3 (e.g: Article 2 TEU), Official Journal 115 , 09/05/2008 P. 0017 - 0017

²⁸ Article 8, Consolidated Version of the Treaty on the functioning of the European Union, Official Journal of the European Union C 83/49 of 30.3.2010.

need to “ensure that equality between men and women and [that] the integration of gender perspective is promoted in the preparation and implementation of programmes” and that the “...appropriate steps [will be taken] to prevent any discrimination based on sex, racial or ethnic origin, religion or belief, disability, age or sexual orientation during the preparation and implementation of programmes”²⁹.

The same approach proposed above for the issues of non-discrimination can be used to ensure equality between men and women with a focus on the gender issue.

In the fields of monitoring and evaluation attention could be given to basic ‘gendered’ monitoring e.g. :

- Counting the number of women and men participating in projects;
- Assessing the number of women and men benefiting from funding;
- Assessing how much support and for which projects women and men are receiving funding (broken down by types of project/Thematic Area).

The assessment of the quality of the eligible project proposals will be based on a set of quality criteria which are common to all Priority Axes and Thematic Areas. As a guide for the evaluators the following indicative aspects could be considered in project selection:

- Consideration of the different starting positions of the target groups based on sex and gender (existence and extent of differences between women and men and the implications of these differences for the specific policy area etc.) and intended and unintended impact of the operation project on those groups in the project concept;
- Consideration of equality between men and women in project implementation, e.g. through inclusion of gender mainstreaming provisions, concerning the special needs and circumstances of men and women employees, introducing flexible, individual arrangements for female employees including childcare, information about these provisions in advertisements for job opportunities.

7. ANNEXES (UPLOADED TO ELECTRONIC DATA EXCHANGE SYSTEMS AS SEPARATE FILES):

- Draft report of the ex-ante evaluation (including an executive summary of the report)
- Confirmation of agreement in writing to the contents of the cooperation programme (Reference: Article 8(9) of Regulation (EU) No 1299/2013)
- A map of the area covered by the cooperation programme
- A "citizens summary" of the cooperation programme
- Strategic Environmental Assessment
